

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology Academic Year 2024 - 2025 (Odd Semester)

Semester, Degree & Branch: V Semester, B.Tech. IT

Course Code & Title: CCS370 & UI and UX design

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit III / Research in UX Design
- **Course Outcome:** CO3
- **Activity Chosen:** Flipped Classroom

- **Justification:**

Flipped Classroom is a type of blended learning where students are introduced to content at home and practice working through it at classroom. It is an inverting classroom approach of teaching. In this approach, the traditional in-class teaching is “flipped” to better meet the needs of individual learners. Students gain control of the learning process through studying course material outside of class, using readings, pre-recorded video lectures. It helps the faculty/lecturer to redefine in-class activities and include homework and keep the students engaged in the content.

- **Time Allotted for the Activity:** 10 Minutes

- **Details of the Implementation:**

The learning material has been posted to the students in canvas before discussing the topic. Two to three topics were mentioned to them for preparation at home. Students should re-think the topic at classroom and present the topic in classroom for his/her peer students. On the day of activity, randomly picked students should present the topic with the help of study materials like pdf, PowerPoint presentation or word document and also using white board. As shown in Fig.1 & 2 students should present the topic which has been prepared by them in-prior.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO2	1	3	3	2	2	2	3	1	2	1	3	3

(1 – Low

2 – Moderate

3 – High)

PO/PSO Mapped:

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO3	2	3	1	3	2	1	2	2	2	1	2	2
Justification for Correlation	Students can be able to design based on user experience and could care about the constraints..	The students will be able to define the UX process and methodology in designing user needs and achieving their goals.	The students could select tools and methods for research on the situations or resources.	The students could design or develop a new application to meet the goals of the business needs for a respective user.	Students could identify situations to obtain the successful results using new technologies.	Students can be able to function effectively as an individual, and as a member or leader in diverse teams to implement design projects	Students can be able to communicate effectively on complex engineering activities with the engineering community	Students could manage the projects with the knowledge gained from the interface design concepts	Students will have the ability to engage in independent and life-long learning about the UI designing techniques	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks	Students could apply the knowledge of features supported by various UX design in developing reliable IT solutions.	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in websites or applications.

Reflective Critique:**❖ *Feedback of practice from students and other stakeholders:***

- Students felt that this kind of learning improves their knowledge as they are learning on their own.
- They felt that their confidence level has been increased while presenting / sharing the learned content with their peers.

❖ *Benefit of the practice:*

- Improved student access to content shared by the Professors and also, they extended their search towards the topic from other sources is a good deed.
- Students were self-motivated and self-directed towards their access to content and delivering it to their peer-students.

❖ *Challenges faced in implementation:*

- Some students hesitated to present their content due to lagging in communication and anxiety.
- After final discussion and encouragement most of them understood the importance of flipped presentation and they tried to present few points.
