

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology
Academic Year 2024 - 2025 (Odd Semester)

Semester, Degree & Branch: V Semester, B.Tech. IT

Course Code & Title: CCS370 & UI and UX design

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit V / **Flow Drawing and Flow Mapping**
- **Course Outcome:** CO5
- **Activity Chosen:** Inquiry Based Learning

- **Justification:**

Inquiry-Based Learning is an approach where students actively explore and investigate topics, posing questions and conducting research to construct their understanding. This method encourages curiosity, critical thinking, and a deeper engagement with the subject matter. Topics given to the students were actively illustrated by them in the format of drawings and mappings.

- **Time Allotted for the Activity:** 15 Minutes

- **Details of the Implementation:**

Flow Drawing and Flow Mapping are the topics provided to the students. They think about and prepare their work with paper and pen/pencil sketching. At the end of the class session 15 minutes has been allocated for students to implement this activity. General topics like university / college admission procedure, impacts of covid – 19, bank account opening process, etc., were given.

Students choose one topic among the given according to their flexibility and draw the Flow drawing, Flow Mapping for that chosen topic. They classified both and explained it.

Finally, students submitted their papers for correction and get corrected if mistakes present in their logic as well as in the structure of the concept.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO5	1	2	3	2	1	-	-	-	2	1	1	1

(1 – Low

2 – Moderate

3 – High)

PO/PSO Mapped:

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO5	1	2	3	3	1	-	-	-	3	2	1	3
Justification for Correlation	Students could identify and apply the research methods for writing problem statements	Students will be able to generate their own personas and ideate the solutions.	The students could select tools and methods for research on the user stories and scenarios.	Students will be able to develop Information architecture and mappings with flow diagrams	Students could use different tools and methods to develop the architecture and flow diagrams.	Students could identify situations of unethical conduct and propose ethical alternatives.	Students can gain knowledge in interface and communicate with the end user for better solution.	Students could manage the projects by creating personas for end customer based on their needs.	Students will have the ability to engage in independent and life-long learning about the various product development tasks.	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks.	Students could apply the knowledge of features supported by various testing and prototype in developing reliable design environment	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in building architecture for the suitable Information provided.

Figure 2. Flow Drawing and Flow Mapping for College Admission Process

Reflective Critique:**❖ *Feedback of practice from students and other stakeholders:***

- Students have the freedom to explore, educators provide a structured framework to ensure that learning objectives are met.
- Students are encouraged to delve deeply into topics, which enhances their understanding and retention of the material.

❖ *Benefit of the practice:*

- Students express more significant interest in the subject matter.
- It leads to greater long-term knowledge retention.
- It works exceptionally well.
- Students have reached a certain level of maturity and have the ability to work both independently and jointly without instructor intervention.

❖ *Challenges faced in implementation:*

- Planning in-prior is most needed for this type of practice.
- Students need to practice test taking skills and what to expect.
- Students will need problem-solving and critical thinking skills.
