

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology Academic Year 2024 - 2025 (Odd Semester)

Semester, Degree & Branch: V Semester, B.Tech. IT

Course Code & Title: CCS370 & UI and UX design

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit I / Fundamentals of Design Thinking
- **Course Outcome:** CO1
- **Activity Chosen:** One Minute Paper

- **Justification:**

Design thinking is a non-linear, iterative process that teams use to understand users, challenge assumptions, redefine problems and create innovative solutions to prototype and test. It is most useful to tackle ill-defined or unknown problems. In one-minute paper activity the students will be given with 5 minutes to write out the brief about that topic. In order to have a recap of fundamentals in design thinking this activity is chosen.

- **Time Allotted for the Activity:** 10 Minutes

- **Details of the Implementation:**

At the end of the lecture, students were instructed to write about the fundamentals learned in design thinking process. During the first 35 minutes, the instructor summarized the concepts of UI and UX design introduction and implementation details in the classroom. The students stated their understanding and interest towards the development of a design page. Figure 1.a and Figure 1.b shows the points about User Interface, Principles and its design thinking concepts shared during this activity. This task assesses students' understanding about UI and UX Introduction. This activity demonstrated the involvement of students in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	1	1	3	1	3	3	2	1	3	3	1

(1 – Low

2 – Moderate

3 – High)

PO/PSO Mapped:

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	3	1	3	2	1	2	2	2	1	2	2
Justification for Correlation	Students could apply visual concepts to develop real-time applications.	Students will be able to analyze the performance of different UI elements and patterns	Students could acquire knowledge about interaction behaviors and various principles.	Students will be able to identify the suitable principle to apply design concepts and create a webpage or an application.	Students could apply recent tools to develop visual impacts for designing an application	Students can be able to function effectively as an individual, and as a member or leader in diverse teams to implement design projects	Students can be able to communicate effectively on complex engineering activities with the engineering community	Students could manage the projects with the knowledge gained from the interface design concepts	Students will have the ability to engage in independent and life-long learning about the UI designing techniques	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks	Students could apply the knowledge of features supported by various UI design in developing branding across the websites	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in websites or applications.

- **Images / Screenshot of the practice:**

Figure 1. a Sample One-Minute Paper of Aarthi S

Reflective Critique:

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that they can able to understand fundamentals and principles of UI and UX design clearly after conducting this activity.
- They felt this activity makes them to concentrate and write-up the content easily with their own ideas.

❖ **Benefit of the practice:**

- Students were actively participated in this activity.
- Students can able to explain the topic without any confusion.
- Make the students to know the impact and importance of sharing their views and understanding related to the topic and made them involve in the activity.

❖ **Challenges faced in implementation:**

- Some students are hesitated and lack to write the concepts that they learnt in the class.
- Some students felt that the content is too vast, so that they couldn't complete the writing on-time. After final discussion they got clear understanding and gained an idea for easy writing.
