

Department of Information Technology
Academic Year 2025 - 2026 (Odd Semester)

Semester, Degree & Branch: V Semester, B.Tech. IT

Course Code & Title: CCS370 & UI and UX design

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit I / Observational Empathy
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO4
- **Activity Chosen:** One Minute Paper

- **Justification:**

Observational empathy in UI/UX design involves designers actively observing users in their natural environment to understand their behaviors, needs, and challenges firsthand, rather than relying on assumptions. In one-minute paper activity the students will be given with 1 minute to write out the brief about that topic. In order to check the student's empathetic perspective this activity is chosen.

- **Time Allotted for the Activity:** 01 Minute

- **Details of the Implementation:**

At the end of the lecture, students were instructed to summarize the observational empathy. During the first 35 minutes, the instructor summarized the concepts of observational empathy, its key aspects and its working methodology. The students learned few more concepts from the video that has been played about Empathy in UI and UX. Figure 1.a and Figure 1.b shows the points about observational empathy written based on the understanding of students during this activity. This activity demonstrated the involvement of students in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	1	1	3	1	3	3	2	1	3	3	1

(1 – Low

2 – Moderate

3 – High)

PO/PSO Mapped:

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	1	1	3	1	3	3	2	1	3	3	1
Justification for Correlation	Students could apply visual concepts to develop real-time applications.	Students will be able to analyze the performance of different UI elements and patterns	Students could acquire knowledge about interaction behaviors and various principles.	Students will be able to identify the suitable principle to apply design concepts and create a webpage or an application.	Students could apply recent tools to develop visual impacts for designing an application	Students can be able to function effectively as an individual, and as a member or leader in diverse teams to implement design projects	Students can be able to communicate effectively on complex engineering activities with the engineering community	Students could manage the projects with the knowledge gained from the interface design concepts	Students will have the ability to engage in independent and life-long learning about the UI designing techniques	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks	Students could apply the knowledge of features supported by various UI design in developing branding across the websites	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in websites or applications.

Reflective Critique:

❖ *Feedback of practice from students and other stakeholders:*

- Feedback from students reveals specific concepts or areas they're struggling with, allowing instructors and stakeholders to pinpoint where instructional improvements are needed.
- Continuous feedback encourages a partnership between students, instructors, and other stakeholders, creating a responsive learning environment focused on shared goals.

❖ *Benefit of the practice:*

- Students were actively participated in this activity.
- Students consolidate their learning by briefly summarizing what they have understood.
- It provides immediate insight into students' understanding, helping instructors identify areas of confusion and adjust their teaching in real time.

❖ *Challenges faced in implementation:*

- Even though it's brief, dedicating time regularly within tight class schedules can be challenging,
- Students might provide very brief or vague answers just to complete the task quickly, limiting the depth and usefulness of the topic.
