

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology Academic Year 2024 - 2025 (Odd Semester)

Semester, Degree & Branch: V Semester, B.Tech. IT

Course Code & Title: CCS370 & UI and UX design

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit II / Foundations of UI Design
- **Course Outcome:** CO2
- **Activity Chosen:** Project Based Learning / Usage of Technology Tools

- **Justification:**

A user interface is the point of interaction between humans and computers, containing everything you see, hear, click, tap, or swipe on when using a website, app, or piece of software. UI design is the process of designing is the interface look, but and also it reacts when a user performs an action. The Usage of Technology Tools activity, can help teachers implement formative assessment practices during lessons. It can help prepare students for a future that is driven by technology.

- **Time Allotted for the Activity:** 30 Minutes

- **Details of the Implementation:**

A design challenge has been given to the students. Few Groups has been created and design topics has been shared among the students. They used various tools and created their own design for the provided topics. As multiple colors and patterns were used by the students, the outcome of practice was asked to submit in the Google drive link shared by the faculty. Figure 1., shows the samples submitted by the students in drive link. This activity demonstrated the designing intelligence of students in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO2	2	3	1	3	2	1	2	2	2	1	2	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO2	2	3	1	3	2	1	2	2	2	1	2	2
Justification for Correlation	Students could apply visual concepts to develop real-time applications.	Students will be able to analyze the performance of different UI elements and patterns	Students could acquire knowledge about interaction behaviors and various principles.	Students will be able to identify the suitable principle to apply design concepts and create a webpage or an application.	Students could apply recent tools to develop visual impacts for designing an application	Students can be able to function effectively as an individual, and as a member or leader in diverse teams to implement design projects	Students can be able to communicate effectively on complex engineering activities with the engineering community	Students could manage the projects with the knowledge gained from the interface design concepts	Students will have the ability to engage in independent and life-long learning about the UI designing techniques	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks	Students could apply the knowledge of features supported by various UI design in developing branding across the websites	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in websites or applications.

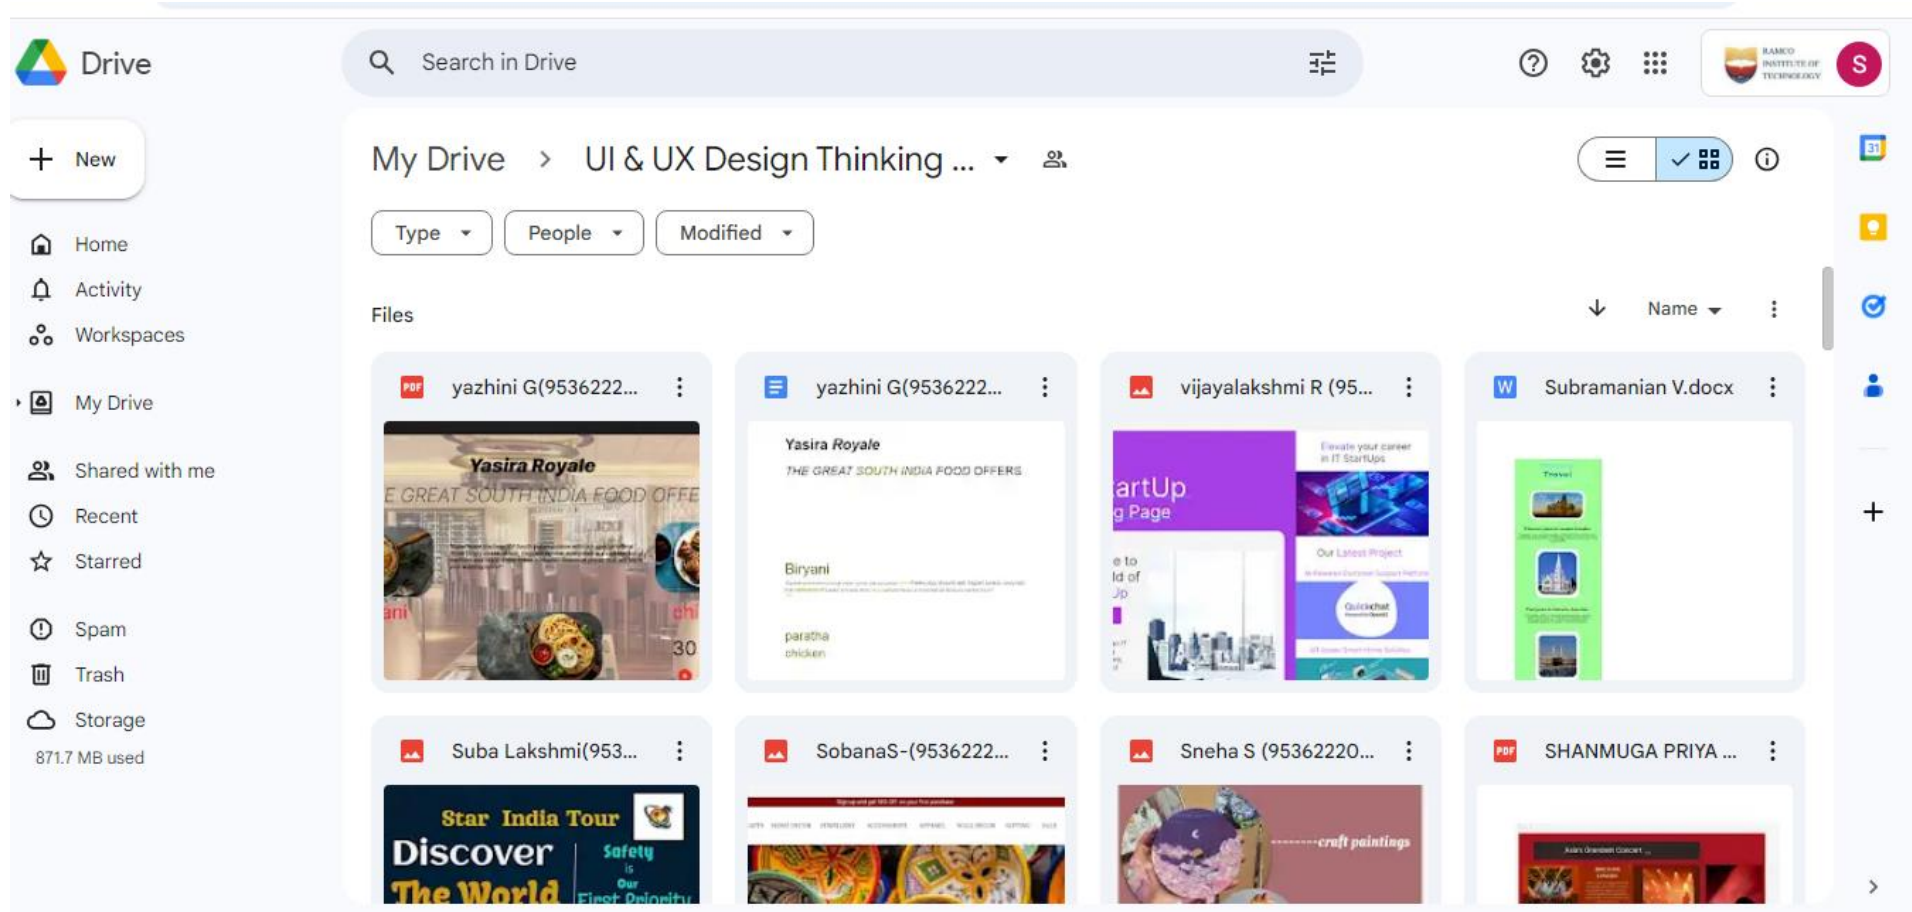

Figure 1. Samples submitted for Usage of Technology Tools via Google drive.

Reflective Critique:**❖ *Feedback of practice from students and other stakeholders:***

- The students felt that they could design for any kind of topics in the field of education as well as for commercial purposes.
- They felt this activity has given knowledge to develop a new pattern which is not existing and also the replica for an existing one.

❖ *Benefit of the practice:*

- Students were actively participated in this activity.
- Students can able to design using various design tools like Figma, Whimsical, Motiff , etc.,
- Allowed the students to develop a design with their own innovations.

❖ *Challenges faced in implementation:*

- Some students were not familiar with few icons available in new tool.
- Some students were not able to choose proper colors and patterns for the given topics. After final discussion they got clear understanding and gained an idea for better presentation.
