

Department of Information Technology

Academic Year 2024 - 2025 (Even Semester)

Degree, Semester & Branch: VI Semester B.Tech. IT

Course Code & Title: CCW332 & Digital Marketing

Name of the Faculty member (s): Dr. K. Palraj, ASP/IT

Innovative Practice Description

- **Unit / Topic:** Unit II / SEM Components
- **Course Outcome:** CO2
- **Topic Learning Outcome:** TLO12
- **Activity Chosen:** Learning by Teaching
- **Justification:**
 - Learning by Teaching is an ideal approach for Search Engine Marketing (SEM) as it reinforces deep understanding, enhances critical thinking, and fosters hands-on learning. By explaining SEM concepts like PPC, keyword bidding, and ad ranking to peers, learners refine their knowledge, improve retention, and develop problem-solving skills crucial for real-world marketing. Teaching SEM also encourages collaboration, strengthens communication, and builds confidence—essential for working in digital marketing environments.
- **Time Allotted for the Activity:** 15 Minutes
- **Details of the Implementation:**
 - A topic SEM Components was given to Ms.S.Sobana one week before the presentation.
 - She prepared the presentation and taken the class on 22.03.2025.
 - The topic was delivered around 10 minutes with an example.
 - She explored different components of Search Engine Marketing (SEM) by discussing key concepts such as Pay-Per-Click (PPC), keyword bidding, ad ranking, and performance tracking. Also, she illustrated these concepts with real-world examples, such as how businesses use Google Ads to target specific keywords, optimize ad copy, and improve conversion rates. Through these discussions, students can analyze how SEM strategies impact online visibility, customer engagement, and return on investment (ROI)
 - The implementation of Learning by teaching activity as shown in figure1.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO2	3	2	2	2	3	2	2	3	3	2	2	3

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
	3	2	2	2	3	2	2	3	3	2	2	3
Justification for correlation	The students learn core concepts like on-page SEO, off-page SEO, and technical SEO, which help them apply their knowledge to optimize websites and improve rankings on search engines	The students develop problem-solving skills by using tools like Google Analytics to conduct keyword research, track website performance, and optimize for search engines	The students learn how to design SEO-friendly websites and create content that attracts both users and search engines, showcasing creativity in digital marketing	The students hone their research skills by identifying the most relevant keywords, tracking competitors, and staying updated with SEO best practices	The students develop expertise in using tools like Google Search Console, Google Keyword Planner, and SEO analytics platforms to implement SEO strategies and measure campaign success	The students learn to work as part of a team, leading and coordinating efforts to ensure that SEO goals are met across different departments and skill sets	The students develop strong written and oral communication skills by crafting SEO-optimized blog posts, landing pages, and marketing materials that engage and inform customers	The students learn to manage SEO campaigns effectively, including setting clear objectives, tracking progress, handling deadlines, and optimizing workflows across teams to ensure successful project outcomes	The students are taught to engage in continuous learning by staying current with SEO trends, attending webinars, reading industry blogs, and pursuing certifications to stay competitive in the digital marketing landscape	The students can apply data science and algorithms in SEO to analyze search trends and optimize website performance for better search engine rankings.	The students are able to utilize emerging technologies like mobile optimization and AI tools to enhance SEO strategies and predict user behavior for improved visibility	The students can implement SEO best practices using open-source tools and engineering strategies to create scalable and high-quality optimization solutions

❖ **Reflective Critique**

❖ **Feedback of practice from students about the LBT:**

- Improved understanding of Google Ads, PPC strategies, and keyword bidding.
- Learning by Teaching (LbT) made concepts clearer through peer discussions
- Real-world examples and case studies enhanced analytical thinking and decision-making.
- Gained confidence in setting up and managing SEM Components.

❖ **Benefit of the practice:**

- **Enhanced Understanding** – Hands-on experience with Google Ads and PPC improved comprehension of SEM concepts.
- **Critical Thinking & Decision-Making** – Analyzing ad performance, keyword selection, and budget allocation strengthened problem-solving skills.
- **Improved Technical Skills** – Gained proficiency in keyword research, ad copywriting, and bid management.
- **Collaboration & Communication** – Peer discussions and feedback enhanced teamwork and idea exchange.

❖ **Challenges faced in implementation:**

- Difficulty in selecting cost-effective keywords and optimizing ad copy.
- Need for more guided exercises and case studies for better campaign execution.
- Managing ad budgets and bid strategies required deeper hands-on practice.
