

Department of Information Technology

Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch : VI Semester-B. Tech Information Technology

Course Code & Title : CCW332 Digital Marketing

Name of the Faculty member (s) : Dr. K. Palraj, ASP/IT

Innovative Practice Description

• **Unit / Topic** : Unit 4 / Building Customer relationships

• **Course Outcome** : CO4

• **Topic Learning Outcome:** TLO26

• **Activity Chosen** : Think Pair Share

• **Justification:**

- Think–Pair–Share (TPS) is a collaborative learning strategy that encourages individual thinking, peer discussion, and group sharing. It is particularly well-suited for the topic Building Customer Relationships in digital marketing, where understanding interpersonal dynamics, trust-building, and customer value creation is essential
- It aligns well with the learning objectives of digital marketing education and encourages meaningful student engagement with both the subject matter and their peers.

• **Time Allotted for the Activity:** 20 Minutes

• **Details of the Implementation:**

- Students will be able to analyze and articulate strategies used by businesses to build and sustain strong customer relationships, and evaluate their effectiveness based on customer satisfaction, loyalty, and value.
- From the students, 3 groups are formed and assigned the topic to each group.

Team	Student	Topic
1	Ajay V	Communication Strategies
	Vijaya Ragavan S	
2	Swathi S	Customer Loyalty and Retention
	Thanishka Shree U	
3	Banu Mathavan V	Personalization and Customer Experience (CX)
	Dhinesh K	

- o First, 3–5 minutes allow to students reflect silently and jot down their ideas, connecting them with relevant course concepts such as CRM, Communication Strategies, loyalty programs, emotional branding, personalization, or after-sales service as shown in Figure 1.
- o Next, Students pair up to discuss their thoughts and experiences. Encourage them to compare perspectives and build on each other's responses and refine their understanding through peer-to-peer interaction.
- o Finally, During the Share stage, All pairs present key insights from their discussion to the whole class. This promotes collaborative learning and helps surface diverse customer relationship strategies shown in Figure 2.

- **Images / Screenshot of the practice**

Figure 1. Pair with neighbour and discuss answer

Figure 2. Ajay V & Vijaya Ragavan S share the answer to entire class

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO2	3	2	2	2	3	2	2	3	3	2	2	3

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
	3	2	2	2	3	2	2	3	3	2	2	3
Justification for correlation	The students learn core concepts such as content creation, engagement metrics, and social media platforms (e.g., Facebook, Instagram, LinkedIn) to build successful campaigns.	The students develop analytical and problem-solving skills by evaluating metrics like engagement rates, click-through rates, and conversion rates, adjusting strategies to optimize results.	The students learn to craft eye-catching social media posts, ads, and stories that resonate with the target audience, while innovating through new formats like video marketing and influencer partnerships.	The students enhance their research skills by using tools like social listening platforms, keyword research tools, and competitor analysis to create data-driven marketing campaigns.	The students are engaging with current industry -relevant platforms and using IT-based tools to enhance digital marketing.	Students gain teamwork skills by working together on social media strategies and content development.	The students improve their ability to communicate clearly and persuasively by creating engaging content that speaks directly to the needs and emotions of their target audience.	The students develop project management skills by coordinating social media activities, managing timelines, setting goals, and ensuring campaigns meet their objectives.	The students develop a lifelong learning mindset by staying up to date with the latest social media marketing strategies, platform changes, and trends, ensuring they remain competitive in the field.	The students apply data analytics and algorithms in social media marketing to refine strategies, optimize targeting, and drive higher engagement rate.	The students utilize emerging technologies like AI and automation tools to personalize content, predict trends, and enhance social media outreach.	The students implement open-source tools and follow best industry practices in social media marketing to create scalable, high-performing campaigns with measurable impact.

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students appreciated the opportunity to actively participate rather than passively listen.
 - Students felt more engaged because they had time to think about the question first and it wasn't just a one-way lecture.
 - Students felt the pair discussion helped to gain more insights, and more confident when it was time to share with the class.

- ❖ ***Benefit of the practice:***

- Students reflect on the concepts and connect them to real-world examples, reinforcing learning through practice.
 - Through peer discussions, students learn from each other's experiences and viewpoints, fostering collaborative learning.
 - By discussing ideas with a peer first, students gain confidence in expressing their thoughts in a larger group, promoting inclusive participation and ensuring all voices are heard.
 - The activity helps students apply customer relationship theories to real businesses, providing practical insights into how companies can build and maintain long-term customer loyalty

- ❖ ***Challenges faced in implementation:***

- Students in the class exhibited varying levels of understanding of customer relationship management concepts, which affected the quality of the discussions.
 - Some students struggled to come up with strong real-world examples of customer relationship strategies, which limited their ability to connect theory with practice.
 - It difficult to manage the time effectively because multiple pairs had valuable insights to share.
