

Department of Information Technology
Academic Year 2025 – 2026 (Even Semester)

Degree, Semester & Branch : IV Semester-B. Tech Information Technology
Course Code & Title : IT3401 Web Essentials
Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT
Innovative Practice Description

- **Unit / Topic : Unit 2 / Box Model**
- **Course Outcome : CO2**
- **Topic Learning Outcome: TLO16**
- **Activity Chosen : One Minute Paper**
- **Justification:**
 - The one-minute paper is a short reflective activity that enables students to quickly summarize important concepts learned during the session and identify areas that require further clarification.
 - This activity was chosen to strengthen students' understanding of the CSS Box Model concepts such as content, padding, border, and margin, along with their importance in webpage layout and spacing design.
 - **Time Allotted for the Activity: 5 Minutes**
- **Details of the Implementation:**
 - The faculty demonstrated the CSS Box Model by explaining how content, padding, border, and margin influence the layout and appearance of web pages.
 - Several examples were discussed to enable students to understand the impact of the CSS Box Model on webpage styling, alignment, and element organization.
 - Following the explanation and interaction session, students were instructed to summarize the key concepts of the CSS Box Model and represent its structure with suitable examples, as shown in Figure 1.
 - The responses were collected and evaluated to assess students' understanding and conceptual clarity, as shown in Figure 2.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO2	3	3	3	2	1	3
(1 – Low 2 – Moderate 3 – High)						

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO3
	3	3	3	2	1	3
Justification for correlation	Students will be able to understand the concept of CSS Box Model and apply it to design web pages	Students will analyze spacing and layout requirements of webpage elements using margin, padding, and border properties.	Students will develop structured webpage layouts effectively using CSS styling techniques.	Students enhance their individual learning and analytical skills through reflective classroom activities.	Students will be able to document and communicate their API design and implementation clearly.	Students will be able to apply the concepts learned in the CSS Box Model to develop effective solutions for frontend web design tasks.

Reflective Critique:

❖ Feedback of practice from students and other stakeholders:

- Students expressed that the activity improved their understanding of the different components of the CSS Box Model and their roles in webpage design.

- Students shared that the activity improved their clarity in using CSS properties for organizing and styling webpage elements.
- The activity enabled students to better understand how spacing and alignment are managed in modern web pages.

❖ ***Benefit of the practice:***

- Students quickly recalled and summarized the important concepts of the CSS Box Model, improving retention and understanding.
- Students connected theoretical concepts with practical webpage styling examples, enhancing application-based learning.
- The activity encouraged active participation and improved student engagement during the session.

❖ ***Challenges faced in implementation:***

- Some students found it difficult to differentiate between margin and padding properties within the limited time.
- A few students made mistakes while drawing or labeling the structure of the CSS Box Model.

In the next class, additional examples were provided to help students better understand the CSS Box Model concepts and their practical usage in webpage design.
