

Department of Information Technology

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch : IV Semester-B. Tech Information Technology

Course Code & Title : IT3401 & Web Essentials (Integrated Course)

Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic** : Unit 1 / Fundamental Computer Network Concepts
- **Course Outcome** : CO1
- **Topic Learning Outcome:** PrO1
- **Activity Chosen** : Live Demonstration
- **Justification:**

The objective of live demonstration activity is to provide students with a comprehensive understanding of fundamental computer network concepts and networking devices, focusing on switches, Network Interface Cards (NICs), and the cabling used for interconnecting computers.

Time Allotted for the Activity: 15 Minutes

- **Details of the Implementation:**

- The instructor provided a detailed explanation of the computer network fundamentals and networking devices in the classroom, covering it comprehensively within a 30-minute session.
- Students are asked to assemble in Data Science Laboratory.
- Instructor show how to ping each other's computer to verify connectivity and briefly explain common issues and how to trouble shoot them in the laboratory.
- Instructor demonstrated how computers are connected to the switch using Ethernet Cables in the Laboratory as Show in Fig 1.
- This activity helped the students to get clarified with their doubts in networking of computers.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO5	PO9	PSO2
CO1	2	1	2	2	1	1

(1 – Low

2 – Moderate

3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO5	PO9	PSO2
Justification for correlation	Students will be able to understand fundamental concepts that enhances engineering knowledge and analytical skills.	Students gained knowledge of physical setup of computer network	Students will be able to trouble shoot network connection problems.	Students able to Understand and explain fundamental networking concepts involves the use of modern tools like ping, tracert etc.,	Students work individually and in teams to set up networks, and thereby enhancing their teamwork skills	Students gained knowledge in fields involving networking, IoT , embedded systems etc

- **Images / Screenshot of the practice:**

Fig 1: Live Demonstration Activity of Fundamental Computer Network

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- The live demonstration activity received positive feedback from students, facilitating their understanding of the fundamentals of computer network.
- This activity keeps students engaged and ensures they participate actively.

❖ ***Benefit of the practice:***

- Students expressed that demonstration activity illustrate how theoretical concepts apply to real-world scenarios.
- Students learned about the fundamentals of Computer network and different topologies
- Students gained knowledge of physical setup of computer networking.

❖ ***Challenges faced in implementation:***

- Some students were less engaged in the demonstration activity.
