

Department of Information Technology
Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch : IV Semester-B. Tech Information Technology
Course Code & Title : IT3401 & Web Essentials (Integrated Course)
Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic** : Unit 4 / Simple PHP Scripts
- **Course Outcome** : CO4
- **Topic Learning Outcome:** PrO4
- **Activity Chosen** : One Minute Paper
- **Justification:**
 - In one-minute paper activity the students will be given with 5 minutes to write brief about that class session
 - A simple PHP script is a small program written in PHP (Hypertext Preprocessor), a server-side scripting language commonly used for web development. and it is the important topic needed for server-side programming.
 - In order to have a recap of basics of PHP script this activity is chosen.
- **Time Allotted for the Activity:** 5 Minutes
- **Details of the Implementation:**
 - Faculty explained the creation of simple PHP scripts with example program to display current date and time on a web page in the previous class.
 - Students were asked to write simple PHP scripts that accept user input from a form and display it back to the user after processing as shown in Figure 1: Simple PHP Script to demonstrate form data processing and display the output.
 - The faculty member collected the paper and corrected the programs as shown in Fig 2. The Students who have written program with mistakes were asked to rewrite it

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO3
CO4	3	2	1	1	1	3

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO3
Justification for correlation	Students will be able to understand the basics of and apply to real world problems	Students will be able to develop dynamic websites using PHP scripts	Students will be able to provide solution by applying PHP scripts	As the student involved in the activity as an individual, the individual programming skill improved	Students Programming skill will be improved as they are developing simple web applications	The PHP based web application development skills gained through this activity helps the students in solving real world problems

• **Images / Screenshot of the practice:**

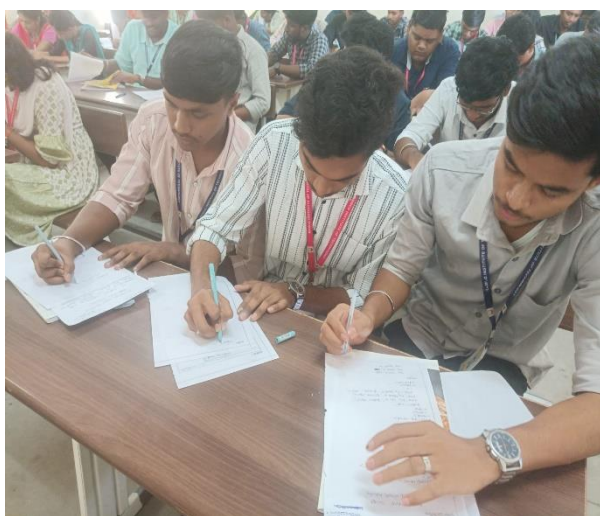

Fig 1: One-Minute Paper Activity

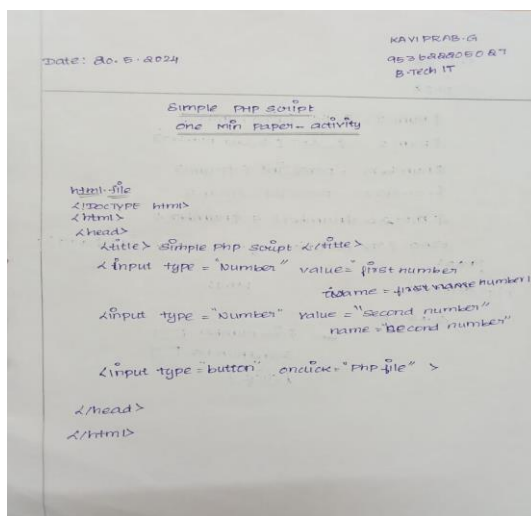

Fig 2: Sample Sheet of Activity of Student G.Kaviprabha

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students said that they were able to recollect and remember the basics of PHP scripts after the activity.
- This activity keeps students engaged and ensures they participate actively.

❖ ***Benefit of the practice:***

- Students remembrance of the concept is improved.
- Students able to understand the basics of PHP scripting.
- Students learned how to build dynamic web pages
- Students server-side programming skill is improved

❖ ***Challenges faced in implementation:***

- Students were struggled to capture key details or reflect critically due to the brief time frame
- Some Students made small mistakes like missing semicolons (;).

The Student Devadharshini.K answered the creation of simple PHP scripts question with following programming mistakes

- i) She confused PHP syntax with that of other languages like JavaScript or Python.
- ii) She committed a mistake in matching brackets.
- iii) She didn't write the required output.

In the next class, I addressed the students how to write PHP script with correct syntax and informed the students to write the required output with respect to the program.
