

Department of Information Technology

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch : IV Semester-B. Tech Information Technology
Course Code & Title : IT3401 Web Essentials (Integrated Course)
Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic** : Unit 5 / Form Get and Post Actions
- **Course Outcome** : CO5
- **Topic Learning Outcome:** PrO5
- **Activity Chosen** : Think Pair Share
- **Justification:**
 - Think Pair Share activity is chosen to make the students to think about how form data is processed using Get and Post actions in Java Servlets. The understanding of Form Get and Post action is essential for implementing java servlet programs.
 - Student think individually about how to use form get and post actions in real time examples like input data from user and form validation etc. This activity makes the student to get in-depth knowledge about handling form data using java servlet.
- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**
 - Instructor explained the concept of handling form data via Get and Post actions in web development using java servlet and also demonstrate the methods of HttpServlet class with examples. After explaining the concept, the think pair share activity was carried out in the class room for a total of 20 minutes.
 - The students were provided with questions on how to retrieve form data using GET and submit data using POST actions. Then the instructor asked the students to **think** individually and write the answer in a paper within 5 minutes as shown in Figure 1
 - Next, the Students were allowed to **pair** up or make a group with neighbour in the class and discuss their points with them in 5 minutes and justify the relevant answer with each other as shown in Figure 2.
 - Few students were called in front of the class and asked to share the correct answer as shown in Figure 3

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO3
CO5	2	2	3	2	2	3

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	The handling of form data using get and post actions in java servlet is introduced to the students who can use it in server-side programming	Students will be able to Get and Post methods of HttpServlet class in web development for reading form data from user	Students will be able to provide solutions for the problem statements using java servlet technology	As the student involved in the activity as team, the team work skill improved	Students communication skill will be improved as they are facing audience	The Students will be to apply the built-in methods of HttpServlet class in developing web applications

- **Images / Screenshot of the practice:**

Fig 1: Students thinking about the given question Fig 2: Pair with neighbour and discuss answer

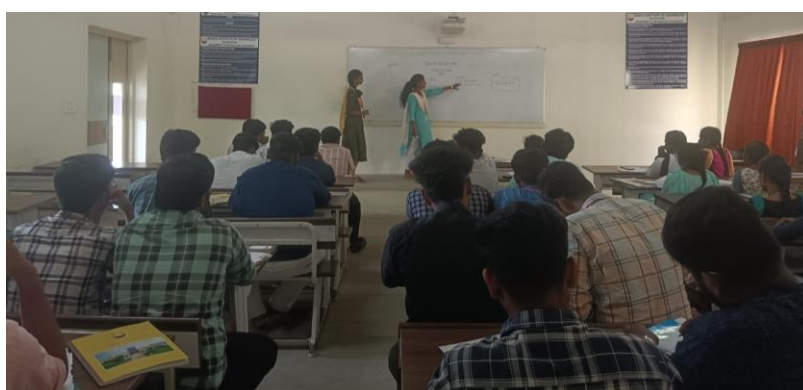

Fig 3: S. Swathi & G. Subalakshmi share the answer to entire class

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students said that the activity is very useful to apply the concept that they learnt to handle from data in java servlet
- Students said that it will be very helpful when preparing for examinations.
- They felt comfortable to share their understanding about the concept with class mates

- ❖ ***Benefit of the practice:***

- Think Pair Share activity gives opportunity among students to share their understanding about the concept with neighbours and also improves their speaking and listening skills.
- This activity is very interactive and made the slow learners to clarify the doubts with their peers.
- It helps in improving students oral communication of by delivering the concepts that they learnt in class.

- ❖ ***Challenges faced in implementation:***

- Few student pairs were randomly selected to perform their presentations in front of the class due to time constraints.
- Make the student to know the impact and significance of sharing their understanding about the topic.
- The activity needs more time to share their views

From the observations, the students were still lagging to understand the concept, so to overcome this, I discussed all the doubts with the students and make them understand the topic.
