

Department of Information Technology

Academic Year 2025 – 2026 (Even Semester)

Degree, Semester & Branch : IV Semester-B. Tech Information Technology

Course Code & Title : IT3401 Web Essentials

Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic : Unit 4 / File Uploading**
- **Course Outcome : CO4**
- **Topic Learning Outcome: TLO36**
- **Activity Chosen : Learning by Teaching**
- **Justification:**
 - Learning by Teaching is implemented as an innovative instructional strategy for the topic PHP File Uploading, where students take the role of instructors and explain the procedures involved in uploading, validating, and managing files in web applications to their peers.
- **Time Allotted for the Activity: 30 Minutes**
- **Details of the Implementation:**
 - Learning by Teaching is an activity in which students learn a concept thoroughly and strengthen their understanding by teaching it to others.
 - To ensure adequate preparation and effective presentation delivery, Mr. P. Shiri Shabari Sudhan was assigned the topic File Uploading before the classroom session.
 - During the presentation, he effectively demonstrated the concepts and procedures related to file uploading, including file selection, validation, and secure storage mechanisms in web applications.
 - The student-led presentation was conducted for nearly 30 minutes, during which various subtopics such as file selection, file validation, server-side handling, and secure storage of uploaded files were explained clearly.
 - Following the presentation, students queries related to file uploading were clarified, and the session concluded with a brief summary to reinforce the important concepts discussed.
 - The classroom implementation of this Learning by Teaching activity is shown in Figure1.

○ **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO4	3	2	2	2	2	3

(1 – Low 2 – Moderate 3 – High)

○ **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
	3	2	2	2	2	3
Justification for correlation	Students will be able to gain a clear understanding of the concepts and implementation procedures involved in PHP File Uploading.	Students will be able to perform essential PHP File uploading operations such as file selection, validation and secure storage of uploaded files in web applications.	Students improve their ability to develop and implement efficient, secure, and user-friendly file uploading features in web applications.	The activity improves students confidence and strengthens their understanding of PHP File Uploading concepts.	Students will be able to improve their presentation and communication skills by explaining technical concepts to their peers.	Students become competent in applying PHP File Uploading concepts while developing real-time web applications.

Figure 1: Screenshot of P.Shiri Shabari Sudhan Learning by teaching activity presentation

○ **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students actively participated in the session and expressed that they gained a clear

understanding of the procedures involved in implementing PHP File Uploading in web applications.

- Through peer teaching, students enhanced their confidence and gained hands-on understanding of managing file uploads in web applications.

❖ ***Benefit of the practice:***

- The practice strengthened students' conceptual and practical knowledge of PHP File Uploading in real-time web applications.
- It also promoted technical learning while improving students confidence in communication and presentation through peer teaching.
- Students were able to discuss and share practical approaches for validating and securely managing uploaded files.

❖ ***Challenges faced in implementation:***

- Students required extra time to discuss their ideas and gain clarification on certain concepts in detail.
- Some students had limited understanding of server-side scripting concepts, which created difficulty in understanding file handling procedures.

At the end of the session, the instructor restated the fundamentals of PHP File Uploading. Students were shown the correct syntax and implementation procedures to avoid common mistakes while validating and securely storing uploaded files in web applications.
