

Department of Information Technology

Academic Year 2024 – 2025 (Odd Semester)

Degree, Semester & Branch : V Semester-B. Tech Information Technology

Course Code & Title : IT3501 & Full Stack Web Development

Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic** : Unit 1 / MVC Architecture
- **Course Outcome** : CO1
- **Topic Learning Outcome:** TLO3
- **Activity Chosen** : Mind Map
- **Justification:**
 - A mind map is a visual representation of concepts and ideas. It is a visual thinking tool that aids to write down ideas quickly.
 - This activity is highly effective for understanding complex architectures like MVC because it visually organizes information, allowing students to see the relationships between the Model, View, and Controller clearly.
 - In order to have a recap of MVC architecture this activity is chosen.
- **Time Allotted for the Activity:** 15 Minutes
- **Details of the Implementation:**
 - Faculty explained the Model View Controller architecture design pattern used in software development with example program in the class room.
 - Based on the discussion and after clarifying the student's doubts, the faculty instructed the students to create a mind map related to the topic in 15 minutes.
 - Each Student created a mind map based on their level of understanding. The sheets were collected from the students by the instructor.
 - This activity helped the students to recall the topic taught that day, generate new ideas about the topic and to answer the questions easily as shown in Fig 2.

• CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO1	3	1	3	1	1	3

(1 – Low

2 – Moderate

3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	Students will be able to understand the concept of MVC design pattern and apply to real world problems	Students will be able to write and develop web application using MVC architecture	Students will be able to illustrate the concept of MVC design pattern as a mind map	As the student involved in the activity as an individual, the individual thinking skill improved	Students will be able to communicate effectively on complex engineering activities	The recollecting and thinking skill gained through this activity helps the students in solving real world problems

• **Images / Screenshot of the practice:**

Fig 1: Mind Map Activity

Fig 2: Sample Sheet of Mind Map Activity of Student S Aarthi

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students said that the activity assisted them in determining their level of understanding of the concept.
- They said it would be useful to recollect the concept in short time.

- They felt comfortable to ask doubts with their peers.
- Students feel easy to understand the MVC Architecture Design pattern.

❖ ***Benefit of the practice:***

- This activity enables students to recall the most important information using keywords, and then visually connect facts and ideas.
- The Mind Map activity made the slow learners to remember the concept easily.
- Students spent their time in self-learning.
- This activity encouraged the students to share their knowledge with others.
- From this activity, Students can get more clarity in the particular topic

❖ ***Challenges faced in implementation:***

- Some of the students represent very less key points in the mind map made a mistake in writing programs using MVC architecture
- It took more time for some students to complete the activity.

The Student Akshaya M represented the Mind Map of MVC architecture with following mistakes

- i) She presented the MVC architecture in chart with less key information
- ii) She didn't represent the Model component in the mind map diagram.

In the next class, I addressed the students how to connect all the key information of MVC architecture and also informed the students to present the mind map neatly.
