

Department of Information Technology

Academic Year 2024 - 2025 (Odd Semester)

Degree, Semester & Branch: III Semester B.Tech. IT

Course Code & Title: CS3362 & Foundations of Data Science

Name of the Faculty member (s): Dr.V.Anusuya, ASCP/IT

Innovative Practice Description

- **Unit / Topic:** Unit III / Regression line
- **Course Outcome:** CO3
- **Topic Learning Outcome:** TLO7
- **Activity Chosen:** Learning by Teaching
- **Justification:**

In Unit III, students are required to understand the concept of the regression line. This practice also enhances their understanding of leadership and voluntarism. Teaching others requires students to thoroughly grasp the subject, reinforcing their own understanding of the material.

- **Time Allotted for the Activity:** 20 Minutes

- **Details of the Implementation:**

- Ms. S. Poongothai was assigned the topic "Regression Line" one week prior to her presentation.
- She prepared the presentation and conducted the class on 30.10.2024.
- The topic was presented in approximately 20 minutes, including an example.
- The implementation of the "Learning by Teaching" activity is illustrated in Figure 1 and Figure 2.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO12	PSO1	PSO2	PSO3
CO3	3	3	2	2	2	2	3	2

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO12	PSO1	PSO2	PSO3
	3	3	2	2	2	2	3	2
Justification for correlation	Apply basic Knowledge and fundamentals of data science for regression line	The students will be able to identify the need for analysis of complex engineering problems	Able to design solutions for any applications using regression	Able to analyze and apply regression concepts	Ability to recognize the need for regression line in real world applications	Exhibit knowledge in regression for data science in application development	Exhibit knowledge in regression line for data science in the field of IoT, Cloud Computing and Data Analytics to provide IT solutions	Exhibit knowledge in regression line for data science in software projects to deliver a quality product.

- **Images / Screenshot of the practice:**

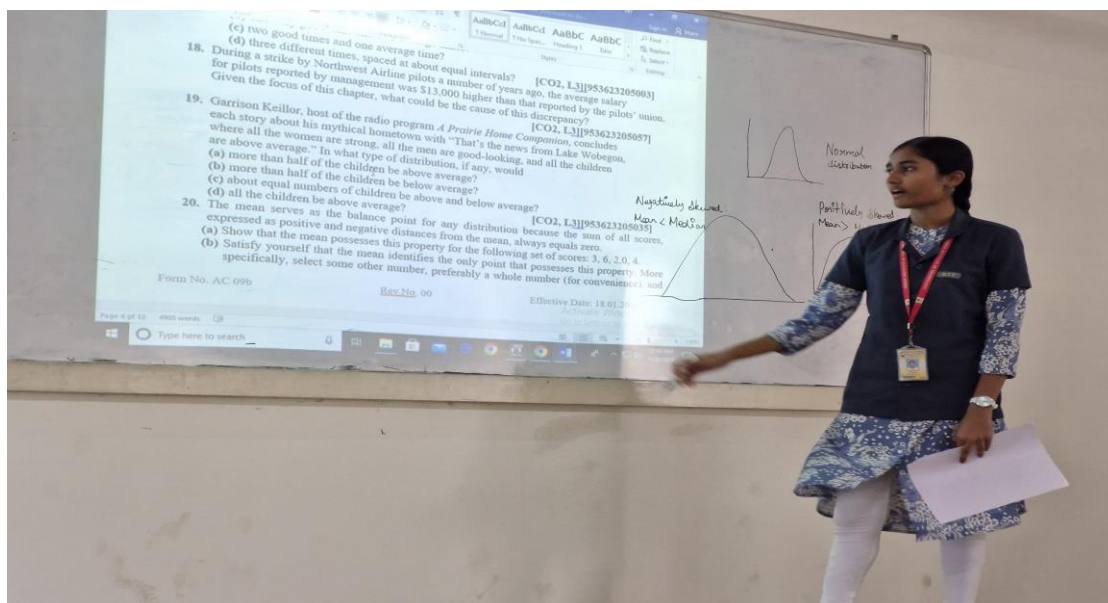

Figure 1: Learning by Teaching Handled by Ms.S. Poongothai

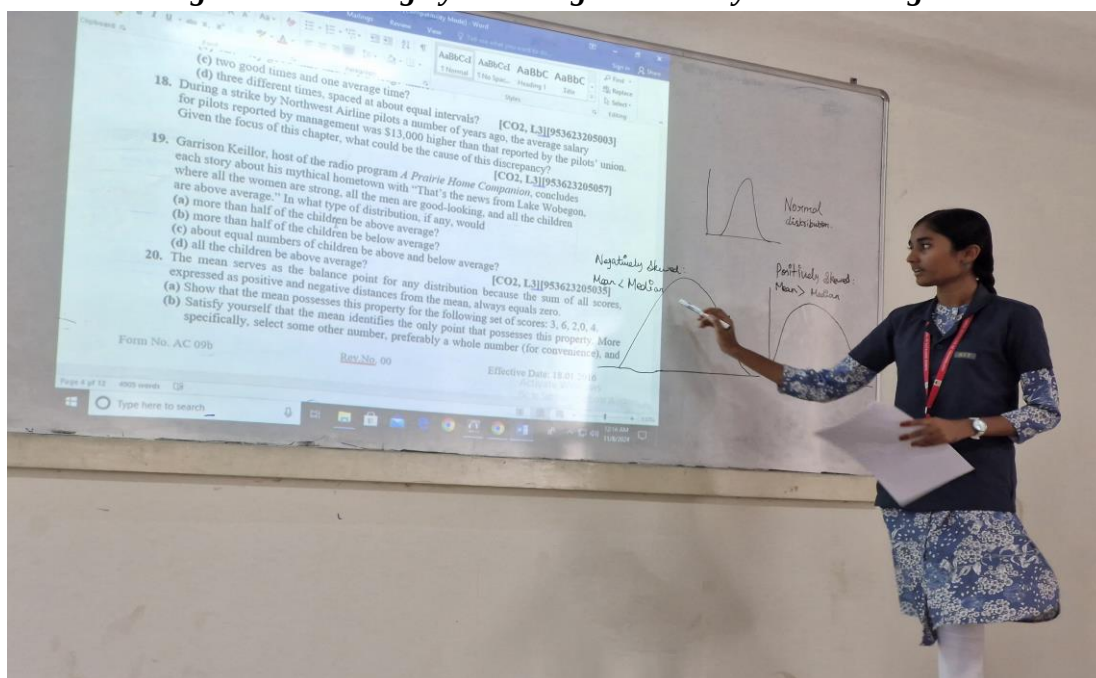

Figure 2: Learning by Teaching

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Every student paid close attention to the class discussion, recognizing the importance of regression.
 - Students understand the concept of a regression line.
 - It aids students in grasping the role of regression in making predictions.

- ❖ **Benefit of the practice:**

- Students are able to understand regression and realize its significance.
 - Students are able to recognize the different kinds of regression and their models.

- This activity helps students in understanding the significance of regression in data science.
- Students develop their ability to convey ideas clearly and effectively.

❖ ***Challenges faced in implementation:***

- Some students difficult to understand initially, after detail explanation the students get interested.
- The topic was planned for 20 minutes, but he took 25 minutes.
