ABOUT THE DEPARTMENT

- We are living in a digital era, which is expected to accelerate advancements in information and communication technology. This emergence has posed a great challenge to the instructional system in terms of familiarizing with emerging technologies.
- With a view of meeting this challenge, the Department of Information Technology was started at RIT in 2022. Its mission is to transform into a centre of excellence for education and research in information technology by embracing emerging technologies. Through academic excellence, collaborative research, value-added courses, and online learning platforms like NPTEL, Coursera, Edx, and others, the department aims to generate highly skilled and socially conscious information technology professionals.
- The Department provides an excellent environment for students to learn and acquire skills required by the industry. The department has experienced faculty members who are completely committed to teaching and research, as well as faculty members who are certified in specialized domains and trained in various platforms such as Infosys Springboard, Kotlin, Microsoft TechSaksham, ZOHO offered Rural Youth Empowerment programme, Digital Marketing, RPA, ISTE AI & ML, Redhat, NPTEL and others.
- Along with developing specific skill sets, the department association's programmes and activities seek to shape students into well-rounded individuals capable of solving real-time problems and possessing values such as discipline, truthfulness, genuineness, team spirit and dynamism.

- To succeed global standards in high-quality technical education, Research and Development in Information Technology by adapting the rapid technological advancement.

- Making quality IT engineers with good technical proficiency by effective teaching to adapt the dynamic needs of industries.
- To take up creative research in collaboration with leading Industries and professional societies to make the nation as a knowledge-power.
- Developing the employability and entrepreneurial skills of the students by conducting industry collaborated training with the strong ethical values and professionalism to serve society with responsibility.

Program Educational Objectives (PEOs)

- **PEO 1:** Graduates will be proficient in leading IT industries, pursue higher study and research, and progress as entrepreneurs by utilizing the fundamental knowledge of various streams in engineering and technology.
- **PEO 2:** Graduates will think logically and pursue lifelong learning skills to understand technical issues related to emerging computing systems and to provide prime or best solutions.
- **PEO 3:** Graduates will be able to develop system applications by understanding the importance of socially committed engineers with high ethical values, business and environmental needs in the social context.

Program Outcomes (POs)

Engineering Graduates will be able to:

- **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

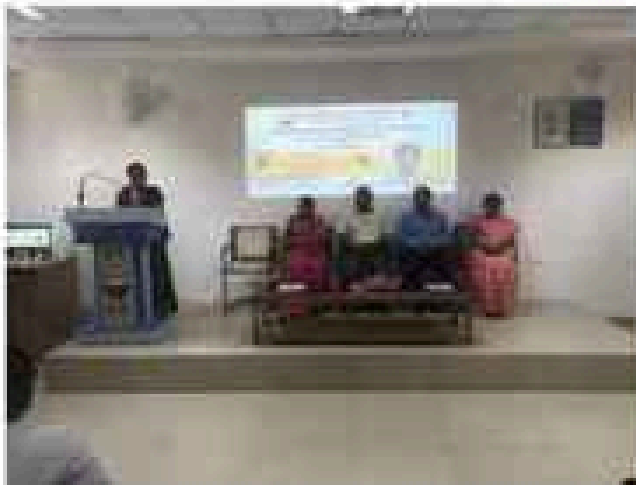

Program Specific Outcomes (PSOs)

- **After successful completion of the degree, the students will be able to:**
- **PSO1:** Apply mathematical and computing skills including Data Science and algorithms to identify and provide solutions for complex computational problems.
- **PSO2:** Develop the skills in emerging technologies such as Embedded Systems and IoT, Mobile Application Development and Security, and data analytics aids in anticipating research findings and providing the reliable IT solutions.
- **PSO3:** Apply standard Engineering practices and strategies in software projects using open source environments to deliver a quality product for business and industry attainment.

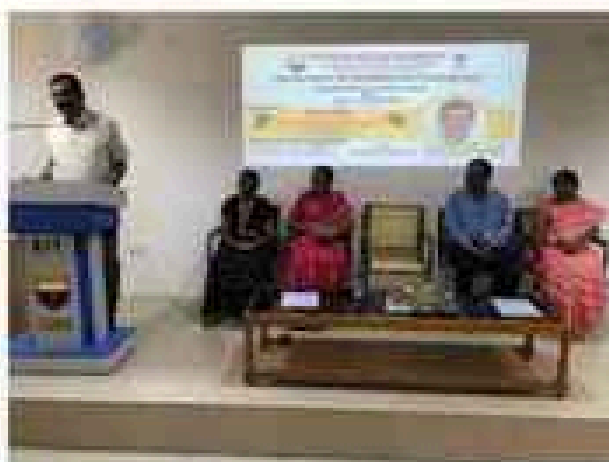

DEPARTMENT OF INFORMATION TECHNOLOGY

RIT INFOTRIX *Inaugural Function*

- The Department of Information Technology, RIT inaugurated the INFOTRIX association on 18.02.2023 (Saturday). Mr. Senthil Ramalingam, Senior Director (IDE), Cognizant Technology Solutions, Coimbatore. Has the chief guest of the function and delivered the chief guest address. He also shared his experience as an project management. Totally 50 students of Department of Computer Science and Business Systems have participated in an Inaugural function. The office bearers of RIT- INFOTRIX were introduced and the secretary of RIT-CSI Ms. G.Harshini from I IT Elaborated the annual plan of INFOTRIX association.

- Department of Information Technology and RIT INFOTRIX organized an Inauguration function for 1 Year IT students. The resource person is Mr. Senthil Ramalingam, Senior Director (IDE), Cognizant Technology Solutions, Coimbatore. This guest-lecture was organized by Mr.R.Dhamotahran, AP/CSE under the guidance of Dr.K.Vijayalakshmi, Prof. & Head/CSE. The resource person agenda is to elaborate on the scope of Information Technology course, student's engineering and technologies trends. Students were excited to learn the diverse engineering roles from him. He showed a road map to students, on how to plan and practice and succeed in careers. He motivated the students to decide the focus, read more about it and do some certification to get more skills in the area. The students interacted with the speaker well and they felt the talk is much valuable and needed by every student. They were all attentive and enjoyed the whole session.

CHALK AND CHEESE

- Chalk and Cheese is a non-technical event that took place on March 9th, 2023, in the CSE seminar hall. The event was conducted by Information Technology in association with RIT Infotrix, aimed at developing communication skills. The event was a huge success with a total of 47 participants. The event incharges were Joel Paulraj and Thanishka Shree.
- Event Details: The event began with a brief introduction from the event incharges. They explained the purpose of the event and how it would help the participants develop their communication skills. The participants were selected by their roll number. The participant had to talk irrelevant topics to other participant, and they had to talk irrelevant till one of the participant get wrong.
- In the first round where both participant had talk irrelevant to each other . The judges evaluated the participants based on their communication skills and confidence level. In the second round, where the shortlisted participants had to talk irrelevant to each other. The judges evaluated the participants based on their time they had taken to defeat opposite participant.
- The third and final round were the second round shortlisted participants were and had to speak irrelevant to other participant on it for three minutes. The judges evaluated the participants based on their spontaneity, clarity of thought, and coherence.
- Winners: After three rounds of intense competition, Vijayaragavan S emerged as the winner of the event, while Sivamaharaja S ,Subramani R was the runner-up. Both participants exhibited excellent communication skills, and the judges were impressed with their performance.
- Conclusion: Chalk and Cheese was an excellent event that helped the participants develop their communication skills. The event incharges, Joel Paulraj M and Thanishka Shree U, did a fantastic job in organizing the event and ensuring that it ran smoothly. Our faculty in-charge Dhamotharan R appreciated the efforts of the participants and congratulated the winners. The judges evaluated the participants based on various parameters, including communication skills, listening skills, critical thinking, fluency, confidence level, spontaneity, and coherence. Overall, it was a great event, and we look forward to more such events in the future.

BEAT THE BUG

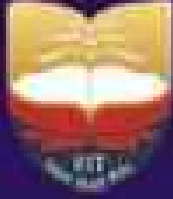

- The technical event "Beat the Bug" was conducted on 1st March 2023 in the CC4 lab of Information Technology Department in association with RIT Infotrix. The event was organized with the aim of testing the programming and technical skills of the participants. A total of 47 students participated in the event, which was coordinated by Harshini G, Sivasekar P and the faculty in-charge Dhamotharan R.
- Event Details: The event was held in the CC4 lab, which was equipped with the necessary technical infrastructure required for the competition. All the participants were provided with a question paper that contained a set of programming and technical questions related to programming language Python. The duration of the event was 1 hour.
- The competition was designed to test the programming and technical skills of the participants. The questions were set in such a way that they would require the participants to think out of the box and come up with innovative solutions. The participants were not allowed to use any external resources or access the internet during the competition.
- The winners of the event were decided based on the accuracy and speed of their solutions. The first prize was awarded to Aarthi S, who solved all the questions accurately within the given time. The second prize was awarded to Harikrishnan K Rahulraj S, who solved most of the questions with accuracy and speed.
- Conclusion: overall, the event "Beat the Bug" was a great success. It provided an opportunity for the participants to showcase their programming and technical skills. The event was well-organized, and the participants were thoroughly engaged throughout the competition. The winners were awarded with certificates and the faculty in-charge Dhamotharan R appreciated the efforts of the participants and congratulated the winners. It is hoped that more such events will be organized in the future to promote technical and programming skills among the students.

TECHNOLOGY

No cell phone for you And you don't want a computer No email or text You don't like technology You want things to stay the same Read the daily newspaper Use printed maps for travel Purchase with a check This shows your opposition But how long will it all last The world is changing Whether you want it to or not It's moving forward So jump on the band wagon Learn to enjoy the progress.
