

RAMCO INSTITUTE OF TECHNOLOGY

Department of Mechanical Engineering

Academic Year 2021 – 2022 (Odd Semester)

Innovative practice(s) description

Course code and title : ME8595 Thermal Engineering- II

Name of the Instructor(s) : Mr.M.Ashok Kumar, AP (SG)/Mechanical
Dr.V.Sivakumar, ASP/Mechanical

Date & Time : 29.10.2021 & 3.50 PM to 04.30 PM

Theory to Practice – Mountings and Accessories of boiler

To explain the working of any machine and engine to the students, Theory to practice (T2P) is one of the best methods. In the subject ME8595 Thermal Engineering-II the Unit II is Boilers, it is important to the student that they should be able to identify the components and the difference between mountings and accessories of boiler to understand the working of boiler very well. Based on that only the students will be able to apply their ideas in order to improve the efficiency of the boiler and that may also be helpful to decide the final year main project in that area of boiler or in thermal power plant and also it will increase the number of industrial projects in the final year. Through this activity all the students were clarifying doubts in working and components identification of boiler which is available in thermal engineering laboratory of Mechanical Engineering Department.

OUTCOME:

- The students will be able to identify the components and explain the working of steam generator.

This activity helps in attaining the following CO – PO & PSO mapping:

Course Outcome / Programme Outcome	PO1	PO2	PO5	PO9	PSO3
CO2 – Explain the functioning and features of different types of Boilers and its accessories and calculate performance parameters.	3	3	1	1	3
