

Department of Mechanical Engineering
Academic Year 2023 – 2024 (Odd Semester)

Degree, Semester & Branch: V Semester B.E Mechanical Engineering

Course Code & Title : CME362 Energy Conservation in Industries

Name of Faculty member : Mr.R.Arun Kumar, AP(SG)/Mech

Innovative Practice Description

- **Unit / Topic** : Unit I / Environmental aspects of Energy generation & Impact of green-house gas emission
- **Course Outcome** : CO1
- **Topic Learning Outcome:** TLO 2
- **Activity Chosen** : Virtual lab
- **Justification:**
 - A presentation or the oral delivery of environmental impact of energy consumption won't make the students feel the consequence much effectively. The visual impact may create the real impact. Thus the V-lab showing the impact of greenhouse gas emission was used to make them to get understand.
- **Time Allotted for the Activity:** 15 minutes
- **Details of the Implementation:**
 1. Students were given an input on impact on energy consumption by means of greenhouse gas emission.
 2. Later the students were given an visual impact of greenhouse gases in increasing the average global temperature through the Greenhouse Gas Effect virtual lab developed by Colorado University.
- **CO – PO / PSO mapping:**

CO	PO5	PO6	PO7
CO6	1	3	3

(1 – Low 2 – Moderate 3 – High)

Note: Justification in Course plan

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

Accredited by NAAC & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

- **Images of the practice:**

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

Based on the feedback collected from the students, they expressed that they were able to learn the environmental impact visually.

- ❖ ***Benefit of the practice:***

✓ Students understood the greenhouse effect and the impact on global warming in terms of numbers too.
