

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Mechanical Engineering Alumni Association

Academic Year 2024 – 2025 (Odd Semester)

Details of Programme Organized

Sl. No.	Contents	Details
01.	Title of the Programme	Student Alumni Interaction- <i>“Bridging Academia and Industry: Insights from Mechanical Engineering at core”</i>
02.	Programme Theme	Alumni – Career Awareness meet (AM/24-25/03)
03.	Programme Type	Alumni Meet
04.	Details of resource persons	Mr.R.Thiyanesh Sakthi (2020-2024 Batch) Royal Enfield, Chennai Project & MSE Department - Finishing line
05.	Mode & Venue / Platform	Offline Mode & TVS Harita Lab
06.	Date & Duration	21.09.2024 & 50 minutes
07.	No. of Student Participants	26
08.	No. of Faculty Participants	1
09.	No. of External Participants	NA
10.	Expenditure amount (if any)	NA
11.	Social Media URL	NA
12.	Video URL (if any)	NA

13. Brief Background & Introduction:

Thiyanesh Sakthi is a distinguished alumnus from the Mechanical Department, class of 2020-24, currently contributing his expertise at Royal Enfield in the Project & MSE Department – Finishing Line. His role involves crucial responsibilities, such as dealing with new product prove-outs, capacity improvement, and solving issues related to both new and existing products. His technical acumen is further demonstrated in his work designing jigs, fixtures, and masks for new products.

When interacting with third-year students, especially those studying mechanical engineering or a related field, the focus should be on bridging the gap between academic knowledge and practical, industry-relevant skills. Here's a suggested approach for engaging with them:

Academic and Extracurricular Accomplishments: Thiyanesh's academic journey is marked by several significant achievements:

1.New Product NEXGEN Hackathon (28 Oct. 2022):

Thiyanesh showcased his innovative thinking and problem-solving skills by winning first prize in this event organized by IIT PALS. His success in the hackathon reflects his ability to conceptualize and develop new products under competitive conditions.

2.Mepco Schlenk Engineering College Competitions (17-18 Feb. 2023):

He secured first prize in "CAD Modeling," second prize in "Paper Presentation," and first prize in "Measure Hunt." These accolades underline his proficiency in design software, his ability to effectively communicate complex ideas, and his sharp analytical skills.

3.PALS-NexGen 3D Hackathon (24 Mar. 2023):

Thiyanesh's team was awarded a cash prize of Rs. 3,000 for their project "Life Size Chainless Bicycle." This accomplishment highlights his collaborative spirit and innovative approach in the field of mechanical design and manufacturing.

4.India Design Week – 2023 (25-26 Apr. 2023):

He was selected to participate in the finals of this prestigious national-level design challenge, organized by Autodesk in association with ICTACT and Sairam Institutions, Chennai. His selection for the finals is a testament to his outstanding design skills and his ability to compete at a national level.

Educational Contributions: Thiyanesh has also made significant contributions to the academic community:

1. Advances in Manufacturing Course:

He completed a rigorous 50-hour advancement course on "Advances in Manufacturing" at Ramco Institute of Technology, Rajapalayam, from April 2022 to February 2023. This course has equipped him with the latest knowledge and skills in manufacturing, which he applies in his current role at Royal Enfield.

2. Research and Publications:

Thiyanesh has presented papers at notable conferences:

- "Design and Analysis of Helmet Locking Device" at the International Conference on Contemporary Research Advancements in Mechanical Engineering (CCRAME 2023) at Ramco Institute of Technology.
- "Experimental Investigation of Mechanical Properties on CF Reinforced PLA, ABS, and Nylon Composite Part" published in Materials Today: Proceedings. These contributions underline his commitment to research and development, particularly in advancing mechanical engineering knowledge.

Recognition and Awards: Thiyanesh's innovative spirit and dedication to his field have earned him several awards:

- *First Prize in New Product NEXGEN Hackathon (2022)*
- *Multiple awards at Mepco Schlenk Engineering College Competitions (2023)*
- *Recognition for his team project in the PALS-NexGen 3D Hackathon (2023)*
- *Finalist in India Design Week – 2023*

Thiyanesh Sakthi Discussion Summary:

- **Industry Relevance of Academic Subjects:**
 - Discuss how the subjects they are currently studying apply to real-world scenarios in your daily work, such as design principles, materials engineering, and manufacturing processes.
 - Emphasize the importance of subjects like CAD modeling, thermodynamics, and manufacturing technology.
- **Importance of Projects and Competitions:**
 - Encourage participation in competitions like hackathons, design challenges, and paper presentations. Share your experiences in the New Product NEXGEN Hackathon and how it helped you develop problem-solving and teamwork skills.
 - Highlight the significance of working on innovative projects like your "Life Size Chainless Bicycle" project, and how such projects can enhance their portfolios.

- **Skill Development:**
 - Discuss the importance of learning industry-standard software (e.g., CAD, CAM) and tools used in mechanical design and manufacturing.
 - Recommend focusing on developing both technical and soft skills, such as teamwork, communication, and time management.
- **Internships and Industry Exposure:**
 - Share insights on how to secure internships and the value they add to understanding real-world engineering challenges.
 - Discuss the importance of networking and staying updated with industry trends.
- **Preparation for the Final Year:**
 - Advise on selecting final-year projects that align with industry needs or their career interests. Encourage choosing topics that are innovative and have practical applications.
 - Provide tips on how to prepare for job interviews and the kind of skills companies like Royal Enfield look for in fresh graduates.

Interactive Q&A Session:

- **Encourage Questions:** Invite students to ask questions about your journey, the challenges you faced, and how you overcame them. This can include questions about specific technical challenges or broader career advice.
- **Problem-Solving Session:** Present a real-world problem you've encountered at Royal Enfield and ask students how they would approach solving it. This can be a great way to engage them and give them a taste of practical engineering challenges.
- **Motivation:** Inspire them to stay curious, continue learning, and be proactive in seeking opportunities that push their boundaries.
- **Availability:** Offer to stay in touch and be available for further questions or guidance through email or LinkedIn.

By focusing on these key areas, you can provide valuable insights that will help third-year students understand the practical applications of their studies and prepare for the transition from academia to the industry.

15. Conclusion:

The session provided a valuable bridge between academic knowledge and its practical application in the industry. Through the experiences shared by Thiyanesh Sakthi R, students gained insight into the critical role that hands-on projects, internships, and competitions play in shaping a successful engineering career. The importance of developing both technical skills and soft skills was emphasized, highlighting the need for continuous learning and adaptability in a rapidly evolving industry.

16. Programme Photographs:

17. What did you learn from this meet?

- Industry-Academia Connection.
- Importance of Practical Skills.
- Value of Projects and Competitions.
- Career Preparedness.
- Skill Development Focus.
- Networking and Mentorship.
- Proactive Learning.
- Problem-Solving Approach.
- Future Orientation.
- Inspiration and Motivation.
