Report
2020-21

Contents

Sl. No.	Name of the Industry	Activities Carried out
1.	Harita Techserv Ltd., Chennai.	- Organized the student interaction programme on “Harita Online Software Training Program” and placement orientation programme on 29.09.2020 and 31.09.2020. 15 students were trained in CATIA and 3 Students got placed through Campus drive.
2.	RIT MEDSBY Innovation Centre, Coimbatore.	- Received Best Collaborator award in National Level out of 100 participants in and around Tamilnadu region. - Guest Lecture on Bio Medical Applications of Additive Manufacturing, 17.02.2020 - Webinar on “3D Printing for Medical Applications” 20.05.2020. - IIT- PALS- NEXGEN 3D HACKATHON – Secure first two places out of 183 participation.
3.	Ramco Group - Textile Division, Rajapalayam.	4 faculty member interacted with technical expert members of Ramco group - Textile division on 15.12.2020 - S.V.Vignesh final year Mechanical Engineering student completed Industry project “Implementation of KAIZEN concept in process Industry” under the guidance of Mr.Abhinav Kumar, Trainee, Ramco Group of Textile Division, Rajapalayam
4.	Gowri House Metal Works, Rajapalayam	4 faculty members interacted with technical expert members of Gowri House Metal Works on 23.12.2020. 6 faculty members interacted with technical expert members related to heat treatment process on 05.01.2021 6 faculty members interacted with technical expert members related to heat treatment process 09.01.2021. - Industry Institute lecture series – 1 organized on 24.01.2021. - Industry Institute lecture series – 2 organized on 28.03.2021. - Industry Institute lecture series – 3 organized on 26.04.2021.
5.	TVS Training and Services, Chennai	- Technical seminar conducted in online mode topic on “Geometry Dimensioning and Tolerance – an industrial view” for III year mechanical engineering on 25.01.2021. 7 students completed Advance Technical Programme

6.	Ramco Cements, RR Nagar	• 5 students have completed 2 week Internship from 05.04.2021 to 17.04.2021
7.	Aravindh Herbal Labs Pvt. Ltd., Rajapalayam	• 5 faculty members visited the industry for identifying the problems on 12.11.2020. • Project proposal submitted in DST under WMT theme titled “Dual benefits in using the waste tyre for waste water treatment and production of automotive seals and gaskets” on 30.11.2020. • MoU signed on 16.12.2020.
8.	NI system private Limited, Bangalore.	• 5 Students from Department of Mechanical Engineering get a training from NI systems • 3 final year students from Mechanical Engineering obtained CLAD certificate by NI Systems
9.	Imarticus learning Pvt. Ltd., Mumbai.	• 10 Students from Department of Mechanical Engineering completed their online course.
10.	Great Learning, Gurgaon.	• 31 Students from Department of Mechanical Engineering completed online course.

Report – Placment Orientation Programme Mr. A. Vijesh Kumar, Manager-Talent Development and Mr.Dhinesh, Harita Techserv Limited, Coimbatore

Ramco Institute of Technology (RIT), Department of Mechanical Engineering organized the Students Interaction Programme on “HARITA ONLINE SOFTWARE TRAINING PROGRAM” and placement orientation for Mechanical Engineering Students on 29.09.2020 & 31.09.2020 through Google Meet-Online Platform. Mr. A. Vijesh Kumar, Manager-Talent Development and Mr. Mr.Dhinesh, Harita Techserv Limited, Coimbatore shared the importance of Software Training & Recent Industrial Trends and Engineering Design Opportunities to the students and explained the detailed training schedule about Courses. Mr.J.Jerold John Britto AP/Mechanical, welcomes the gathering and Mr.R.Prabhakaran, AP/Mechanical coordinated the entire programme.

Harita Techserv
We are an Engineering service experts having 23+ year of experience, and its our people, process and technology that work in tandem to benefit our customers, and help them gain a competitive edge.

- Design Engineering Services Company
- Established in 1996 and part of the TVS group
- Headquartered in Chennai with regional offices at Bengaluru, Pune and Coimbatore .
- Authorised Value Solution partner for Dassault Systems
- Services offered include design services , CAD –
- Customization, Internet of Things –Solutions
- Training services
- Business Verticals - Automotive, Construction & Industrial Machinery, Medical Equipment and Consumer Electronics
- Talent pool of 650+ FTEs and growing
- 10,000+ Man years of Experience in design with over 24+ years of existence in Mechanical Design Services Domain
- Customers: OEMs, MNC Captive R&D Centers, Tier-1 MNCs

650+ Engineers

Dear Sir/Ma'am,

Greetings From Harita..!!

The below mentioned candidates have been shortlisted from RIT.

Convey our Hearty Wishes to all the members who got shortlisted...!!

1	N.P.MAHADEVAN	953617114044
2	Mukesh G	953617114056
3	S. KALAIPRABHU	953617114032

Warm Regards,**Vijesh Kumar**

Hi,

Thank you for sharing the details..!!

We will conduct the campus recruitment in an online mode, Mr Dhinesh will contact you for the same.

based on a convenient date we can conduct the interview.

Regards,

Vijesh Kumar

Dear Sir,

Harita Tech Serv which is our serving partner since the inception of our institution. We believe in the best partnership with harita tech serv for our students prompting carriers. With the telephonic conversation had between mechanical fraternities and the harita team, the profile of candidates who'd match your requirement is enclosed with the mail.

Let us know how this year's drive can be planned.

On the whole 15 students are ready to take up the process ..

Thanks and regards,

RIT-MEDSBY – Innovation Centre

Received Best Collaborator award in National Level out of 100 participants in and around Tamilnadu region.

Guest Lecture on Bio Medical Applications of Additive Manufacturing, 17.02.2020

A guest lecture was organized by Department of Mechanical Engineering on 17.02.2020 at RIT - Harita Centre of Excellence for students who are studying VIII semester Elective Subject ME6018 – Additive Manufacturing Students. The main objective of this guest lecture is to enhance the knowledge on Customized implants and prosthesis: Design and production, Bio- Additive Manufacturing, Computer Aided Tissue Engineering (CATE) and Case Studies. The sessions were handled by Mr. Guru Prasanth G, CEO and Founder, Medsby Healthcare and Engineering Solutions, Coimbatore. Mr.J.Jerold John Britto, AP(Sr.Gr)/Mech coordinated the programme.

Report – Webinar on “3D Printing for Medical Applications”

RIT-MECH CAD CENTRE, Department of Mechanical Engineering in association with MEDSBY Healthcare and Engineering Solutions organized webinar on “3D Printing for Medical Applications” on 20.05.2020 (Wednesday) 04:00PM to 05:00PM . Mr.G.Guru Prasandh, CEO & Founder, MEDSBY Healthcare and Engineering Solutions, Coimbatore was the resource person for this webinar. Totally 730 Participant registered and 251 participants attended due to restriction in Google Meet Platform and whole webinar was telecast in RIT Mech CAD CENTRE channel through Youtube live also.

Mr.J.Jerold John Britto,AP(SG), Mr.R.Venkatesh,AP/Mech, Mr.R.Prabhakaran,AP/Mech and K.Amudhan,AP/Mech coordinated the webinar session.

Mr.G.Guru Prasandh (Resource Person) initially started with history of Medsby Healthcare and Engineering solutions & 3D printing products and he explained about 3D Spatial Dimension and Fundamentals of Additive Manufacturing, Biomedical Application, Bio Compatible Materials Usage, and he shared FDM construction and fabrication process.

IIT- PALS- NEXGEN 3D HACKATHON – Secure first two places out of 183 participation.

HACKATHON 2020-21

E-CERTIFICATE OF APPRECIATION

is awarded to **SUBRAMANIYAN**, a student of III YEAR, MECH department, **RAMCO INSTITUTE OF TECHNOLOGY**, a partner institute of PALS 2020 - 21, on successful completion of the PALS-NexGen 3D Hackathon, conducted by PALS and NexGen 3D Ltd, Chennai, held from **March 1st to 7th, 2021**.

PALS-NexGen 3D Hackathon is a week-long program that helps transform the budding engineer into a creative and innovative engineer.

SUBRAMANIYAN from the team **TEAM MECH**, has completed the project to **DESIGN AND DEVELOP A BOTTLE BASED ON THE CRITERIA AND 3D PRINT IT**, was awarded a team cash prize of **INR 3000**, and believes that as an individual, can use this knowledge and potential to make the world a better place.

Palghat V Mohan
Chairman, PALS

Anuradha S Ramanujam
PALS Champion, PALS Hackathon

Padmaja Reddy
Director, Business Development,
NexGen 3D Ltd., Chennai

In the PALS- Hackathon Program, the participants learn how to provide design solutions applying knowledge gathered on their own, to work in inter disciplinary teams for 96 hours, and present their product communicating effectively in text, video and viva to the panel of judges. These values help them gain a new perspective. The program was offered in the hackathon format and spread over seven days. (registration-qualifying test-case study of choice -96 hours- submission of documents- judged by an Industry Expert and a PALS Representative.

HACKATHON 2020-21

E-CERTIFICATE OF APPRECIATION

is awarded to **M.THODJESH NANDHA**, a student of III YEAR, MECH department, **RAMCO INSTITUTE OF TECHNOLOGY**, a partner institute of PALS 2020 - 21, on successful completion of the PALS-NexGen 3D Hackathon, conducted by PALS and NexGen 3D Ltd, Chennai, held from **March 1st to 7th, 2021**.

PALS-NexGen 3D Hackathon is a week-long program that helps transform the budding engineer into a creative and innovative engineer.

M.THODJESH NANDHA from the team **ASPIRANTS**, has completed the project to **DESIGN AND DEVELOP A BOTTLE BASED ON THE CRITERIA AND 3D PRINT IT**, was awarded a team cash prize of **INR 2000**, and believes that as an individual, can use this knowledge and potential to make the world a better place.

Rajapalayam
2. Date of visit : 15.12.2020
3. Number of faculties visited : 3
4. Name and designation of the faculty visited : 1. Dr.M.Kaliappan, Prof./CSE
2. Dr.P.Sureshkumar, ASCP/Mech.
3. Dr.V.Sivakumar, ASCP/Mech.
5. Purpose of the visit : To interact with the technical expert members
in Rajapalayam Mills Ltd., Rajapalayam
6. Person whom to meet in the industry : Mr. Murugan, HR Manager,
Mr.P.Balaji, Chief Works Manager
7. Detail description of the visit :

The various section and the work flow available in the C unit of Rajapalyam Mills Ltd. were demonstrated by the employee Mr.Jeya Gurunathan to the faculty members. The following points were observed

- Working of Bale plucker, vario cleaner, Uni mix, flexi clean and Jossi devices available in the blow room
- Carding unit (fiber to fiber separation)
- Working of Breeder draw frame, UNI LAP, Comber, finisher draw frame and simplex/speed frame in preparatory section
- Producing yarn by ring frame
- Linker coner section
- Quality testing section
- Packaging section

The way of 5s implementation and its effectiveness derived from the employees, systematic approaches followed in the stress management system for all category of employees in the organization, possibility of allocating project work to the RIT students were discussed with the HR Manager during the visit.

The scope to do problem is identified in the quality section and further study and feasibility should be checked in the later visit.

Report on “Industry Institute Lecture Series – 1”

Name of Industry: Gowri House Metal Works LLP, Rajapalayam.

Topic: Heat Treatment Process

Duration: 1 Day (24.01.2021)

Venue: Mechanical Seminar Hall

Number of Participants: 12

Name of the Resource Person / Speaker: 1. Dr. P. Suresh Kumar, ASCP / Mechanical.
2. Dr. O. Senthil Kumar, ASCP / Chemistry.

The program started with the welcome address given by Mr. N.L. Sujin, AP / Mechanical, and followed by the presidential address given by Dr. V. Sivakumar, ASCP / Mechanical.

Session 1 & 2:

The first and second session was handled by Dr. P. Suresh Kumar, ASCP / Mechanical, on the topic “Heat Treatment Process”. In this session the resource person explained the basics of metal structure and its types. Later he explained the different heat treatment process and its applications.

Session 3:

The third session was handled by Dr. O. Senthil Kumar ASCP / Chemistry. During this session the resource person explained the various effects of heat treatment process and the chemical changes in the material properties.

Finally Mr. M. Ashok Kumar, AP (SG) / Mechanical, thanked the participants, resource person and the program coordinators. The entire program is coordinated by Mr. N.L. Sujin, AP / Mechanical.

Feedback by Participants:

Based on the analysis of the feedback received from participants; following are the observations made:

- Programme/course content – **Very Good**
- Rate the lecture sessions / presentations – **Very Good**
- Rate the practical sessions – **Good**
- Rate interactive sessions – **Good**

- Quality of course material given to you – **Very Good**
- Usefulness of programme in improving your skills – **Very Good**
- Improved your knowledge / skills after attending the programme – **50% – 75%**
- Rate the timely communication in all aspects of the programme – **Very Good**
- Rate the overall arrangement and conduct of the programme/ course – **Very Good**
- Contents discussed were relevant to the topics planned – **Yes**
- Would you like to have another programme by the same Resource person – **Yes**

A	Programme/course content
B	Rate the lecture sessions / presentations
C	Rate the practical sessions
D	Rate interactive sessions
E	Quality of course material given to you
F	Usefulness of programme in improving your skills
G	Improved your knowledge / skills after attending the programme
H	Rate the timely communication in all aspects of the programme
I	Rate the overall arrangement and conduct of the programme/ course

Would you like to have another programme by same person?

6. Mr. R. Arun Kumar, AP / Mech.
5. Purpose of the visit : To interact with the technical expert members
in Gowri House Metal Works LLP, related to
the heat treatment plant.
6. Person(s) whom to meet in the industry : Mr. A.R. Jaisaravanan, Production Manager.
7. Detail description of the visit :

Heat loss occurs in the heat treatment plant and this increases the higher electricity consumption by the heater coil which is used to maintain heat and maintain the higher temperature during the heat treatment process. The detailed study of heat treatment plant was done during the last visit.

In this visit the different possibilities of heat loss from the heat treatment plant was discussed with the production manager Mr. A.R. Jaisaravanan. Also we have suggested few ideas to reduce the heat loss from the plant.

AP (SG) / Mech.
5. Mr. J. Jabinth, AP / Mech.
6. Mr. K. Vigneshwaran, AP / Mech.
5. Purpose of the visit : To interact with the technical expert members
in Gowri House Metal Works LLP, related to
the heat treatment plant.
6. Person(s) whom to meet in the industry : Mr. A.R. Jaisaravanan, Production Manager.
7. Detail description of the visit :

In Gowri House Metal Works, the screws are treated in the heat treatment plant for getting good hardness. Initially the screw is hardened in the hardening section and followed by the oil quenching process. Then the screw is undergoes the tempering process to reduce the internal stress in the screw material.

Heat loss occurs in the heat treatment plant and this increases the higher electricity consumption by the heater coil which is used to maintain heat and maintain the higher temperature during the heat treatment process. The detailed study of heat treatment plant was done during this visit.

4. Mr. T. Selva Sundar, AP / Mech.
5. Purpose of the visit : To interact with the technical expert members in Gowri House Metal Works LLP, Rajapalayam.
6. Person whom to meet in the industry : Mr. A.R. Jaisaravanan, Production Manager.
7. Detail description of the visit :

The various sections and the work flow available in the Gowri House Metal Works LLP were demonstrated by the employee Mr. Jaisaravanan to the faculty members. The following points were observed

- Wire drawing machines available in the wire drawing section.
- Heat treatment section – Annealing.
- Screw manufacturing section – machining process.
- Automatic screw manufacturing unit – Automatic machines section.
- Final Heat Treatment section – Hardening, Quenching and Tempering.
- Zinc plating section.
- Quality testing section.
- Packaging section.

The way of 5s implementation and its effectiveness derived from the employees, systematic approaches followed in the stress management system for all category of employees in the organization, possibility of allocating project work and internship to the RIT students were discussed with Mr. Jaisaravanan during the visit.

The scope to do problem is identified in the final heat treatment section and further study and feasibility should be checked in the later visit. In addition to this major

problem some of the minor problems were identified in various sections are as follows,

- Automatic wire discharge in wire drawing section.
- Automation of screw collection unit in machining section.
- Automatic alarm system in machines in machining section.
- Automatic stop in nailing machine.

Report – Online workshop on “Geometric Dimensioning and Tolerance – an industrial view”

A one day workshop on “Geometric Dimensioning and Tolerance – an industrial view” in association TVS – Training & Services Limited, Chennai conducted on 21.01.2021 (Friday) as session _I from 10.00 AM to 12.00 PM and session – II from 2.00 PM to 4.00 PM to improve the knowledge in the field of Geometry Dimensioning and Tolerance which is the important skill required to interpret the technical drawing in the industry. Totally 60 students from third and final year Mechanical Engineering attended this online workshop.

Resource persons:

Mr.S.Sasidhar, Manager and trainer, TVS Training and Services Limited, Chennai.

Coordinators:

Mr.M.Ashok Kumar, AP(SG) / Mechanical

The coordinator Mr.M.Ashok Kumar, AP (SG) / Mechanical welcomes the participants and resource person. The resource person covers the following topics in the morning session and conducted a quiz at the end of each sub topic.

- Introduction to dimensional tolerance
- Introduction to Geometric dimensioning and tolerance
- Form tolerance and its application
- Overview of Datum

The resource person discussed in detail the following topics in the evening and conducted a quiz at the end of each sub topic.

- Orientation tolerance and its application
- Runout tolerance and its application
- Location tolerance and its application
- Profile tolerance and its application
- Benefits of Geometric Dimensioning and tolerancing

Successfully

Factory Visit
(19.10.2020)

Report

at

The Ramco Cements Limited,
R.R.Nagar,
Virudhunagar

Faculty Members:

1. Dr.L.Ganesan – Principal
2. Mr.K.Selvaraj – DGM (A)
3. Mr.Dharmar – HoD Incharge/Civil Engineering
4. Dr.K.Vijayalakshmi – HoD/Computer Science and Engineering
5. Dr.S.Kannan – HoD/Electrical and Electronics Engineering
6. Dr.S.Periyanayagi – HoD/Electronics and Communication Engineering
7. Dr.P.Sureshkumar – Associate Professor/Mechanical Engineering
8. Dr.K.Basarikodi – HoD/Mathematics

Faculty Members reached the factory at 9.00 am. PRO of the factory welcomed us and explained about the traditional values of R.R.Nagar plant with photos. He also explained about history of the plant and the eminent persons visited the factory from inception to recent days.

Principal and DGM (A) met the Factory head and explained about the purpose of visit such as to know about the step by step process of cement industries, industrial problem identification and placement opportunities for our students. Factory head accepted principal's request and allotted two plant incharges (Mr.S.Kannan, GM(Engineering), Mr.M.Mahesh, Senior DGM(E&I) for guiding the faculty members.

First, Incharges take us to show the overall process monitoring unit by Ramco System developed ERP software called Optima (Process Optimization solution). They explained about each and every step of processing sequence of plant starting from raw materials to finished goods. The automated software has shown animated picture of process sequence and process parameter variation of each unit.

They have explained about Proportioning, Blending & Grinding in manufacturing unit. The raw materials from mines are routed in plant laboratory where they are analyzed. The proper proportioning of limestone and clay are optimized before the beginning of grinding. The plant equipped with horizontal mill type where they grind the raw mix with the help of heavy wheel type roller and rotating table. Rotating table rotates continuously under the roller and brought the raw mix in contact with the roller. Roller crushes the material to a fine powder and finishes the job. Raw mix is stored in a pre-homogenization pile after grinding the mix to fine powder.

We went to Processing Phase II: Preheating of Raw Materials section: After final grinding, the material is ready to face the preheating chamber. Preheater consists of series of vertical cyclones from where the raw material passes before facing the kiln. Preheating chamber utilizes the emitting hot gases from kiln. Preheating of material saves the energy and make plant environmental friendly.

We visited the Kiln Phase: Kiln is a huge rotating furnace which is also called as the heart of cement making process. Here, raw material is heated up to 1450 °C. This temperature initiates a chemical reaction called decarbonation. In this reaction, materials (like limestone) release the carbon dioxide. High temperature of kiln makes slurry of the material. The series of chemical reactions between calcium and silicon dioxide compounds form the primary constituents of cement i.e., calcium silicate. Kiln is heating up from the exit side by the use of natural gas and coal. When material reaches the lower part of the kiln, it forms the shape of clinker. They explained about the importance of clinker making process through kiln phase. Major feature for the Plant was upgraded with the latest SF Cooler for clinker cooling.

We visited testing section where they tested the powder by XRD. Quality control equipment like the Cross Belt Analyzer, XRF, XRD are in use there for testing of powder. The mineral content of raw material is analyzed through X-Ray Diffractometer. Based on the X-Ray Diffractometer, they are adding the additive contents in cement. We enquired about cost of XRD device details for research purpose. They also informed to contact Ramco Research Development Centre (RRDC), Chennai regarding the testing of solid and powder.

We have also visited the raw material erection section. The plant has 2 – 100 ton tippler section. They have also shown the demonstration of tippler when unloading condition.

Apart from plant visit, we have also visited occupational health centre which is located at the plant itself. The centre is fully equipped with bed and physiotherapy sections. Dedicated doctor and nurses are available in health centre at 24/7.

We have visited Ramco Vidyalaya school which is located at the factory campus. The Principal of school welcomed all the faculty members and explained about their achievements. Our principal requested to send their students to RIT for getting quality education. He also explained about the scholarship details to students and placement status of RIT.

	
	The lunch has been provided by Cement factory at 1.30 pm
Mining Section	Afternoon we have visited Ramco Mines, Pandalkudi. Mines officials have welcomed us for their factory visit. Initially, they have explained about plant location and manufacturing process through PPT. There are photos of 5 mines which were shown through Google map. Further, they have taken us to show the mines location (7 benches).  We have also observed that the completed mines are transformed into Ecological park. This is a great initiative taken by our group. Finally the visit has completed at 6.00 pm. Areas identified for project during visit 1. Mortar cube testing parameters are changed by manually. Optimization technique
Page 6	

- may be used for parameter optimization in order to make less testing time
2. The Control Equipments like PLC, SCADA may be upgraded with new technologies like LabVIEW.
 3. Condition monitoring of Critical equipments, Fault analysis may be done inorder to avoid catastrophic failure of equipment
 4. Energy conservation in Lighting, by measuring the Lux level, illumination level may be done.
 5. Sodium Vapour lamps may be replaced with LED Lamps for conservation of Energy.
 6. Instead of Conventional DOL and Rotor resistance starters, VFD may be employed in phased manner.
 7. Wear and tear analysis may be conducted in frequent interval for moving parts
 8. Curing time may be reduced through accelerator curing technique
 9. EDAX device might be adapted for finding the chemical composition of raw material in accurate manner
 10. Processing speed and accurate color identification technology may be improved. Already they have adapted through German based technology.

M/s. Aravindh Herbals Pvt. Ltd.,
Rajapalayam |

7. Detail description of the visit

The working of pulverizer and capsule filling machine was absorbed by the faculty members and then had a discussion with Mr. R.Aravindhan, Proprietor of the industry.

The problem statements derived during the discussion are listed below.

- Introducing an automation system in the existing manual capsule filling operation
- Minimizing the invisible losses take place in Pulveriser
- Identification and segregation of hair in the herbal leaves sample
- Identification and cleaning of Micro Eggs in the herbal leaves sample
- Maintain the temperature of the honey chamber
- Development of ERP for Herbal Industry (Interdisciplinary)
- Enhancement the efficiency of the pulse monitoring device (Interdisciplinary)

The solution of these problems can be attained by making involvement of students of Ramco Institute of Technology as well as faculty members. The industry requested the faculty members
