

# **RAMCO INSTITUTE OF TECHNOLOGY**

## **Department of Mechanical Engineering**

**Academic Year: 2019- 2020 (Odd Semester)**

**Date: 19.07.2019**

**Degree, Semester & Branch: VII Semester B.E. Mechanical Engineering**

**Course Code & Title: ME6012-Maintenance Engineering**

**Name of the Faculty members:**

**Dr.S.Godwin Barnabas,AP(SG)/Mech &Mr.J.Jabinth AP/Mech**

### **Innovative practice: Learning through Argumentation**

#### **Topic: Maintenance categories**

#### **Use of learning through argumentation**

- Students can advance their understanding of technical concepts by arguing in ways similar to professional scientists and mathematicians.
- Argumentation helps students attend to contrasting ideas, which can deepen their learning.
- It makes technical reasoning public, for all to learn. It also allows students to refine ideas with others, so they learn how scientists work together to establish or refute claims.

#### **Procedure to use Learning through Argumentation**

- Teachers can spark meaningful discussion in classrooms by encouraging students to ask open-ended questions, re-state remarks in more scientific language, and develop and use models to construct explanations.
- When students argue in scientific ways, they learn how to take turns, listen actively, and respond constructively to others.
- Professional development can help teachers to learn these strategies and overcome challenges, such as how to share their intellectual expertise with students appropriately.

**During the learning through argumentation session held on 19.07.2019 at mechanical seminar hall**

**Open end questions thrown towards the students after the session**

### **Closing session by summarizing the contents discussed by the subject handling faculty**

#### **Outcome of this session:**

- Students will enrich their knowledge in categories of maintenance.
- It provides way for the slow learners grasp the valuable points during the session. Such as 1. Main classifications of planned and breakdown maintenance 2.salient features of each maintenance policies.
- By throwing various possibilities of open ended questions on the topic handled students will gain the depth in the categories of maintenance.
