

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year 2019 – 2020 (Odd Semester)

Innovative practice(s) description

Course code and title: GE6787 Total Quality Management
Name of the Instructor(s): Dr.S.Rajakarunakaran, Professor, Mechanical
Mr.M.Santhana Maruthu Pandian, AP/Mechanical
Date & Time: 19.07.2019 & 11:45PM to 12:35PM

Case study on 8 dimensions of Quality

Quality Gurus state that quality depends on every individual's perception. Thus they have identified 8 dimensions of quality which appeals for a customer to judge a product or service. The 8 dimensions of quality are:

1. Performance
2. Features
3. Reliability
4. Durability
5. Conformance
6. Serviceability
7. Aesthetics
8. Perceived quality

Students were divided into 8 groups and each group were assigned with each dimension. The course instructors delivered the content by addressing a case study. In which the following two mobile products were compared based on these 8 dimensions.

1. Samsung S 10 plus
2. One plus 7 pro

Through this case study student were able to understand the concept of Quality dimensions in which they have interacted and raised doubts for getting clarity. Later each student group were assigned with a task of submitting an group assignment in which they have to identify two products or services of two different companies and to compare and justify the best product or service in their perspective based on the dimension assigned to them. This will enable the students to get insight knowledge in this topic.

This activity helps in attaining the following CO – PO mapping:

Course Outcome / Programme Outcome	PO2	PO4	PO6	PO7	PO10
CO1 – Student will be able to discuss the contributions of Quality Guru	2	2	1	1	3
