

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year:2020-2021(Even Semester)

INNOVATIVE PRACTICE DESCRIPTION

Course code and title: PR8592 – Welding Technology

Name of the Instructor: Mr.S.Kathiravan, AP/Mechanical

Date & Time: 30.04.2021 & 11.00 AM to 11:50 PM

Innovative practice: Connection with welding

Topic: Other welding Process

DESCRIPTION:

Connection game combines the best of **word** searching for tremendous brain challenging fun. This will make the students to understand the basic terminologies related to various welding process. The main objective of this connection game to make students interactive and active participation in identification of welding process.

The images are displayed in the Power point presentation through google meet. The students should identify the images and connect those words technically and interlink with various welding process.

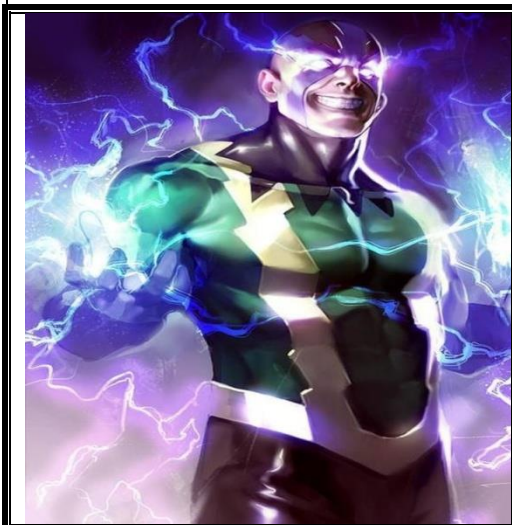

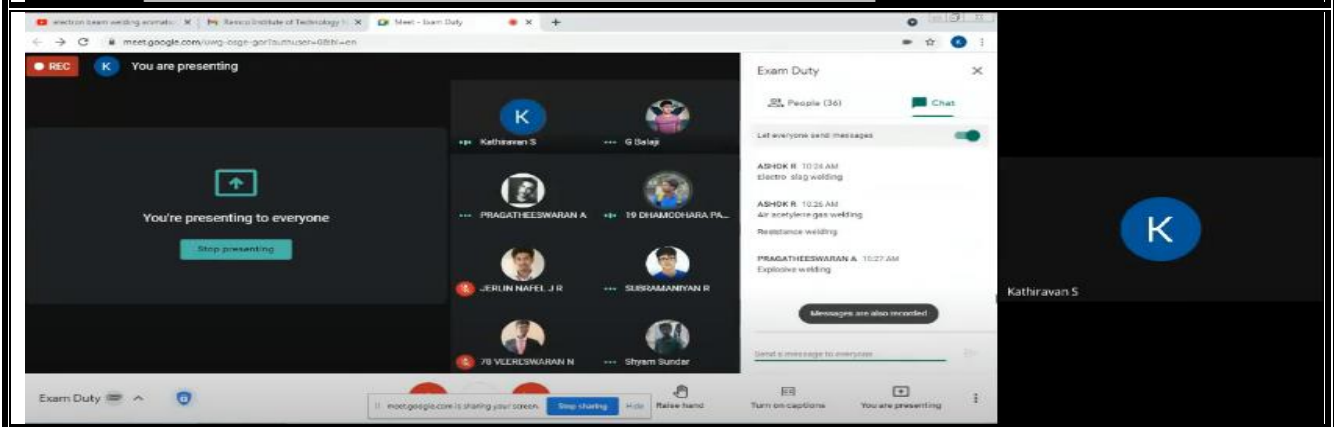

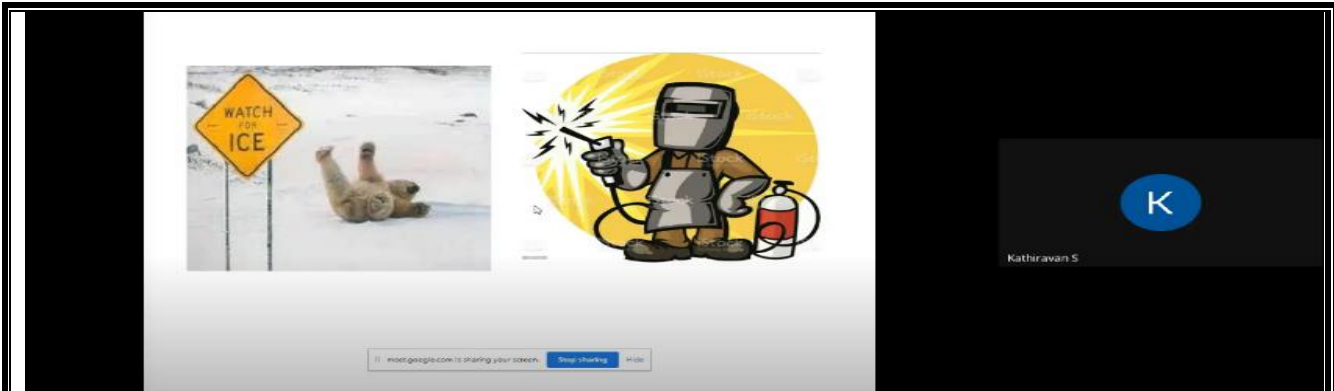

OUTCOMES:

a)In this activity, students were given to find a word from the presentation and were asked to explain the various the terms in welding process .

b)Through this activity the students should be able to recall the concepts easily and think individually and improve their level of understanding and also able to understand the concepts in other welding process.

This activity helps in attaining the following CO – PO mapping:

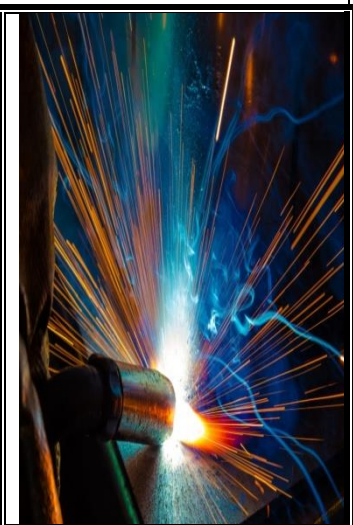

Course Outcome / Programme Outcome	PO1	PO7	PO8	PO9	PO10	PO12
C04: The student will be able to explain the working principle of various special welding process	1	2	1	2	3	2

Electro

Slag

welding

ANSWER : ELECTRO SLAG WELDING
