

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year:2020-2021(EvenSemester)

INNOVATIVE PRACTICE(S) DESCRIPTION

Course code and title: PR8592 – Welding Technology

Name of the Instructor: Mr.S.Kathiravan, AP/Mechanical

Date & Time: 09.03.2021 & 11.50 AM to 12:40 PM

Innovative practice: Cross Word Puzzle

Topic: Gas welding and Arc Welding

DESCRIPTION:

A **puzzle** consisting of letters arranged in a grid which contains a number of hidden **words** written in various directions. Word puzzles help to improve students's processing speed, so they are able to arrive at the correct answer, faster. Many word puzzles require not just a good vocabulary and a knack for spelling, but the ability to think logically and strategically. For example, crosswords make student think about how the words interact on the grid, while code breakers encourage them to consider multiple possible solutions before hitting on the right one.

OUTCOMES:

a)In this activity, students were given to find a word from the available work sheet and were asked to explain the various the terms in welding process .

b)Through this activity the students should be able to recall the concepts easily and think individually and improve their level of understanding and also able to understand the concepts in Gas welding, Arc Welding.

This activity helps in attaining the following CO – PO mapping:

Course Outcome / Programme Outcome	PO1	PO7	PO8	PO9	PO10	PO12
C01: The student will be able to explain the working principle of arc and gas welding	1	2	1	2	3	2
