

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year 2019 – 2020 (Odd Semester)

Innovative practice(s) description

Course code and title: ME6701 Power Plant Engineering

Name of the Instructor(s): Dr.V.Sivakumar, AP(SG)/Mechanical

Mr.K.Vigneshwaran, AP/Mechanical

Mr.N.L.Sujin, AP/Mechanical

Date & Time: 24.07.2019 & 4:10 PM to 5:00 PM

Activity on constructing the layout of coal based thermal power plant out of waste material

After completion of the Unit I Coal based thermal power plant in ME6701 Power Plant Engineering it is expected that the student will be able to describe the various systems of the coal based thermal power plant.

In this activity, students were given to construct a layout from the available waste material and were asked to explain the various components used in the coal based thermal power plant.

Finally, the students have fabricated a layout of the coal based thermal power plant with available waste material and were explained the functions of the various components.

This activity helps in attaining the following CO – PO mapping:

Course Outcome / Programme Outcome	PO1	PO3	PO4	PO5	PO6	PO8	PO9	PO12
CO1 – Student will be able to describe the various systems of coal based thermal power plant.	3	2	2	2	1	1	1	1
