

RAMCO INSTITUTE OF TECHNOLOGY

Department of Mechanical Engineering

Academic Year 2019 – 2020 (Even Semester)

Innovative Practice(s) Description (MECH ANALYZER – Interactive Learning)

Course code and Title	: ME8492 – Kinematics of Machinery
Name of the Instructor(s)	: Mr. J. Jabinth, AP / Mechanical
Date & Time	: 16.02.2020 & 07.04.2020
Semester and Branch	: V Semester –Mechanical Engineering

Online Assignment Using MECH ANALYZER

Mech Analyzer software is an online tool which can be used to understand the variation of velocity and acceleration according to the position of various links of the mechanism. Before giving assignment, the basic principle and a demo is given to students in classroom. After that an assignment is posted in google classroom and received the assignments through online mode. The screenshots were listed below,

Innovative Assignment – 1

Instructions

Student work

 Draw any of the cam profile using Mech analyzer software and upload as image or PDF format here

JABINTH J • Feb 16

10 points

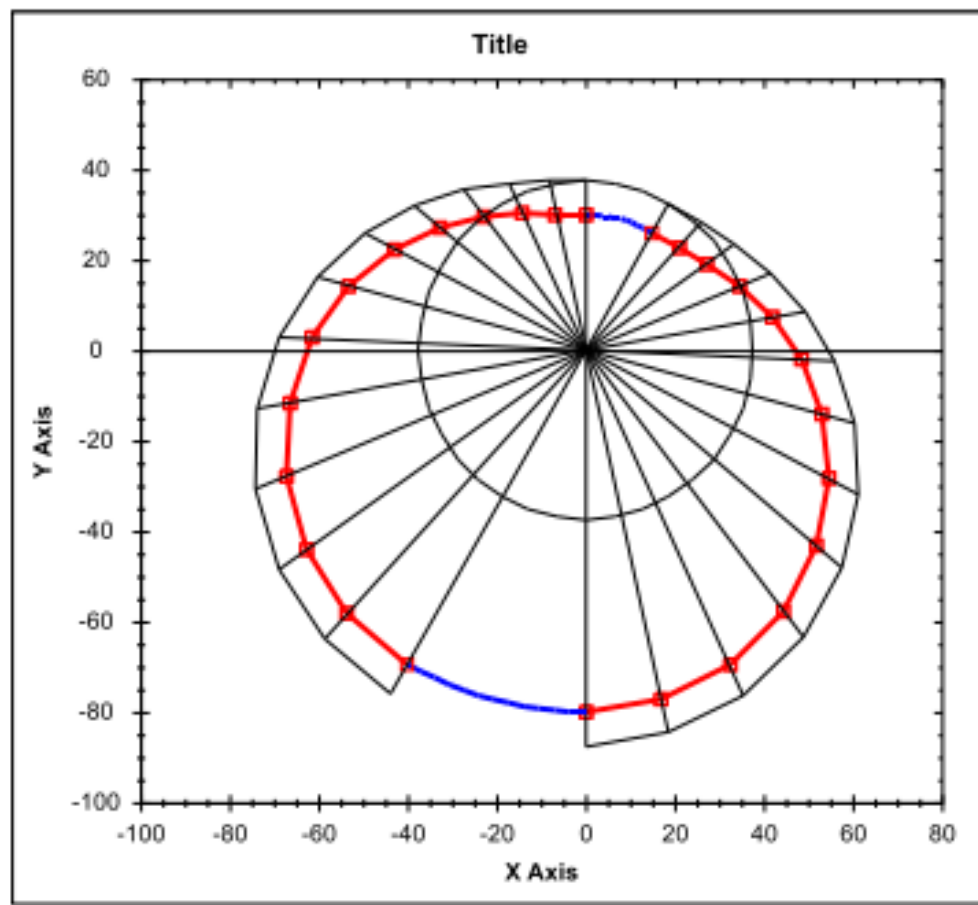

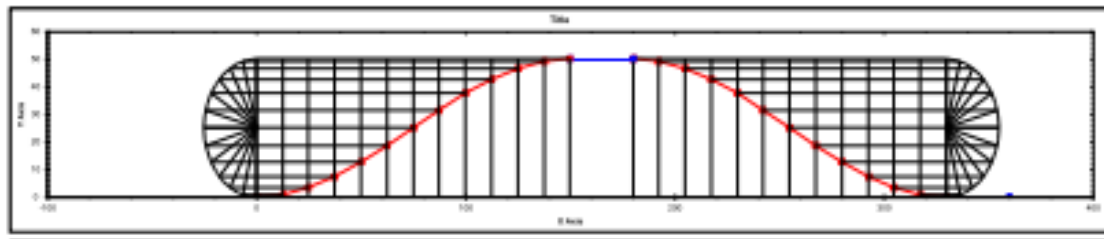

Must check for accuracy before submission.

Every individual must solve different problems.

Class comments

Answer Submission:

Cam Profile Roller

Innovative Assignment - 2

Assignment - 1 (Velocity & Acceleration diagram)

JABINTH J • Apr 7

20 points

Draw and upload it here

5 class comments

43 NALLIRAJ MADHAVAN M Apr 8

Sir I already submitted

JABINTH J Apr 8

Ok

Sridharan S Apr 11

Sir I too submitted and got correction

JABINTH J Apr 11

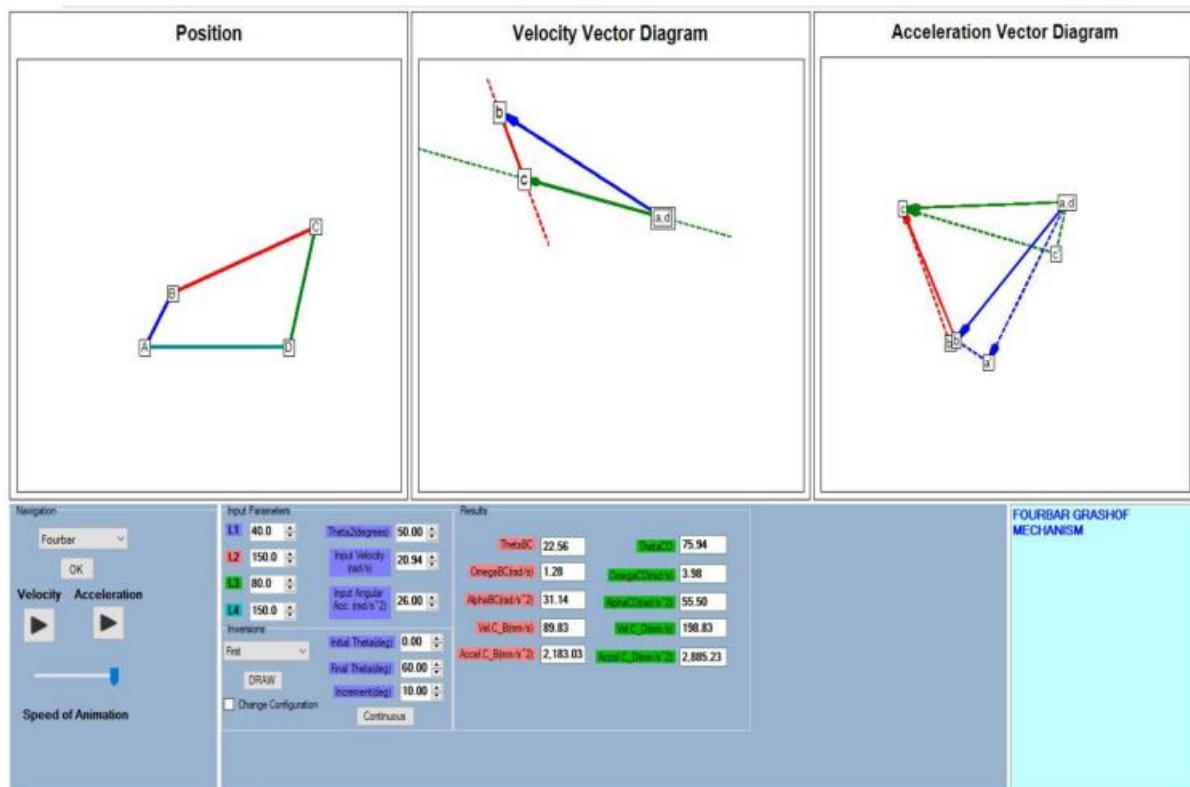

Ok I will check and put mark

BHARATH PRADEEP S Apr 15

I am also submitted sir

Answer Submission:

OUTCOME:

- CO2 – Calculate velocity and acceleration in simple mechanisms.
- CO3 – Draw CAM Profiles

This activity helps in attaining the following CO – PO mapping:

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3	PSO4
CO2	3	2	2	2	3					2		3	3			3
CO3	3	2	2	2	3					2		3	3			3
