

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year 2019 – 2020 (Even Semester)

Innovative practice(s) description

Course code and title : ME8493 Thermal Engineering - I

Name of the Instructor(s) : Mr.M.Ashok Kumar, AP (SG)/Mechanical
Dr.V.Sivakumar, ASP/Mechanical Engineering

Date & Time : 09.01.2020 & 3.20 PM to 04:10 PM

Peer learning in the topic of performance calculation of Dual and Brayton cycle

To improve the problem solving skill among the students, peer learning is one of the best practices. After completion of the Unit I in ME8493 Thermal Engineering-I it is expected that the student will be able to calculate the performance parameters of Dual and Brayton cycle. Through this activity all the students share their problem solving techniques to group members. Totally 10 groups have been formed and each two groups have been given one problem and the students were directed to solve by sharing their knowledge.

OUTCOME:

The problem solving skills will be improved among the students.

This activity helps in attaining the following CO – PO & PSO mapping:

Course Outcome / Programme Outcome	PO1	PO2	PO3	PO5	PO8	PO10	PO12	PSO3
CO1 – The student will be able to apply thermodynamic concepts of different air standard cycles and solve problems.	3	3	3	1	1	1	1	1
