

RAMCO INSTITUTE OF TECHNOLOGY

Department of Mechanical Engineering

Academic Year 2019 – 2020 (Even Semester)

Innovative practice(s) description

Course code and title : ME8493 Thermal Engineering- I

Name of the Instructor(s) : Mr.M.Ashok Kumar, AP (SG)/Mechanical
Dr.V.Sivakumar, ASP/Mechanical

Date & Time : 13.02.2020 & 4.10 PM to 05:00 PM

Theory to Practice in the topic working of 2-Stroke and 4-stroke Internal Combustion

Engine

To explain the working of any machine and engine to the students, Theory to practice (T2P) is one of the best methods. In the subject ME8493 Thermal Engineering-I the Unit III is Internal Combustion Engine and combustion, it is important that the student will be able to understand the working and identifying the components of Internal combustion engine for improving the performance in calculating the various efficiency and power developed by the engine. Through this activity all the students were clarifying doubts in working and components identification of 4-Stroke and 2-Stroke IC Engines which is available in thermal engineering laboratory.

OUTCOME:

The students will be able to identifying the components and working of 4-Stroke and 2-Stroke IC Engines.

This activity helps in attaining the following CO – PO & PSO mapping:

Course Outcome / Programme Outcome	PO1	PO2	PO3	PO5	PO8	PO10	PO12	PSO3
CO1 – The student will be able to apply thermodynamic concepts of different air standard cycles and solve problems.	3	3	2	1	1	1	1	1
