

RAMCO INSTITUTE OF TECHNOLOGY

Department of Mechanical Engineering

Academic Year: 2019- 2020 (Odd Semester)

Degree, Semester & Branch: VII Semester B.E. Mechanical Engineering

Course Code & Title: ME6712- Mechatronics Laboratory

Name of the Faculty member: Mr.S.Valai Ganesh, AP/Mech, Mr.T.Selva Sundar, AP/Mech and Mr.K.Amudhan, AP/Mech

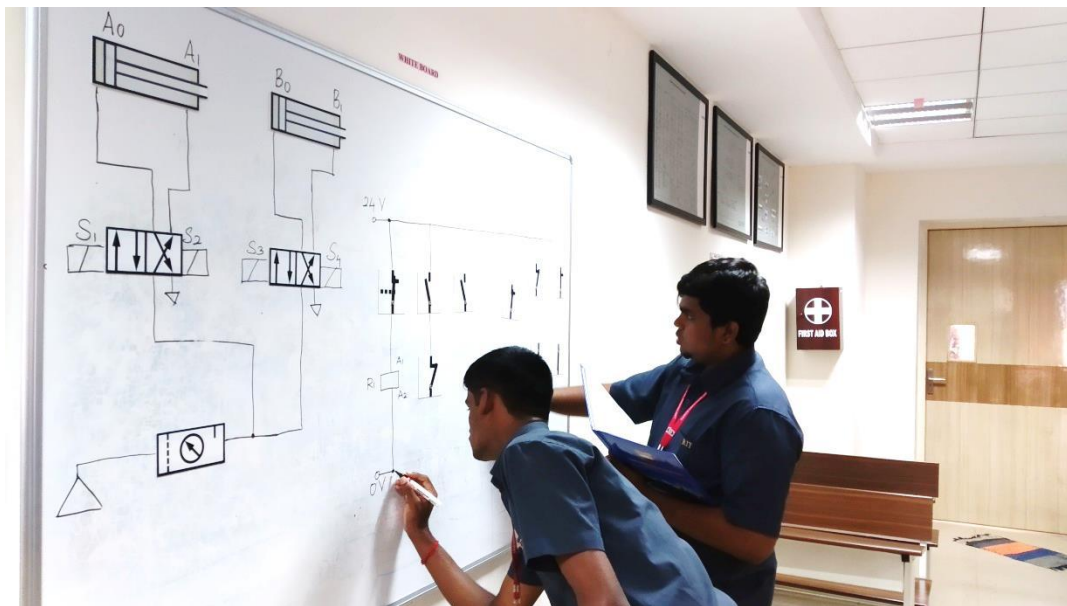

Date: 24.07.2019

Innovative practice: Modern Tool Usage- Magnetic Symbols

Topic: Electro Pneumatics Cascade Circuit

Electro Pneumatics cascading operations normally done by students using software's and hardware's available in the Mechatronics Laboratory. With the help of Magnetic symbols student can able to do circuit simulation in magnetic board for pneumatics, Hydraulics and Electro-pneumatics/hydraulics operations.

DURING MODERN TOOL USAGE SESSION

Students using magnetic symbols in boards to perform cascade operations

Student discussed with others about magnetic symbols actuation and cascading operations

SESSION OUTCOMES:

- Using Magnetic tools to perform circuit simulation makes students to think independently and frame many real time applications.
- This makes the students to create self-interest to plug and play various circuits in magnetic boards.
- It provides student to work from some basic operations to real complex applications in automation

CO-PO Mapping

Course Outcome/ Programme Outcome	PO2	PO3	PO4	PO5	PO9	PO10
CO4-Simulate the various pneumatic and hydraulic circuits for real time applications.	2	2	2	3	3	2
