

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year 2019-2020 (Even Semester)

Innovative practice(s) description

Course code and title: IE6605 Production Planning and control

Name of the Instructor(s): Dr.S.Rajakarunakaran Professor/Mechanical

Dr.S.Godwin Barnabas, ASCP/Mechanical

Date & Time: 27.01.2020 & 010:15 AM to 11.00 AM

T2P (Theory to Practical) work measurement calculation

- After completion of the UNIT II: Work Study in IE6605 Production Planning and control it is expected that the student will be able to calculate the Normal time and Standard Time in work measurement.
- By this practice students understand how the task should be assigned to complete the specific job.
- Students will come to know Work measurement provides basis for proper planning.
- Through this activity, the students are made to see lively how work measurement is carried out using recording devices like stop watch, camera and video recorder etc.

OUTCOME:

- This theory to practice was important to help bridge the gap between oral learning and hands-on experience.
- Student will understand it is the key element in production activity.
- Students will be able to explain the work measurement and its necessity in production activity.

This activity helps in attaining the following CO – PO mapping:

Course Outcome / Programme Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO9	PO12
CO2 – student will be able to explain the Normal time and Standard Time in work measurement	3	2	2	2	1	1	1	2
