

RAMCO INSTITUTE OF TECHNOLOGY
Department of Mechanical Engineering
Academic Year:2020-2021(Even Semester)

INNOVATIVE PRACTICE DESCRIPTION

Course code and title: PR8592 – Welding Technology

Name of the Instructor: Mr.S.Kathiravan, AP/Mechanical

Date & Time: 12.05.2021 & 9.50 AM to 10.45 PM

Innovative practice: Virtual welding - Online game

Topic: Weld Joints

DESCRIPTION

The new Welducation Basic App from Fronius supports virtual learning: the app has a game function which enables users to experience welding interactively and features a quiz that conveys useful information on the joining process.

Virtual Welding On Smartphone Or Tablet

Those who prefer to learn through practice rather than theory can gain experience in the game app with virtual welding. The touchscreen becomes a workpiece and your finger becomes a welding torch. There are different levels to the game—the higher the level, the more difficult the welding task. Users can weld melt runs or fillet and butt welds, for example. The virtual trainer supports the player by showing them the ideal welding speed and position using color signals. The aim is to score as many points as possible through consistent and accurately welded seams. Users can also save their points from the game in the online rankings.

OUTCOMES:

a) In this activity, students were given to find a word from the available work sheet and were asked to explain the various terms in welding process.

b) Through this activity the students should be able to recall the concepts easily and think individually and improve their level of understanding and also able to understand the concepts in Gas welding, Arc Welding.

This activity helps in attaining the following CO – PO mapping:

Course Outcome / Programme Outcome	PO1	PO7	PO8	PO9	PO10	PO12
C05: Student will able to explain the weld joint design, weldability and testing of weldments	1	2	1	2	3	2
