

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Civil Engineering

Academic Year 2022–2023 (Odd Semester)

Degree, Semester & Branch: V Semester B.E Civil Engineering

Course Code & Title: EN8491 Water Supply Engineering

Name of the Faculty member(s): Mrs. C. Subha

Innovative Practice Description

- **Course Outcome: CO2**

- **Activity Chosen: Visible Quiz**

- **Justification:**

The choice of pumps and pipe materials in water supply engineering is very important. To revise and assess the understanding level of the students, visible quiz activity was conducted.

- **Time Allotted for the Activity: 10 minutes**

- **Details of the Implementation:**

- 15 questions on the topic of pipe materials and pumps in the water supply are prepared in a power point presentation.
- The students were split into a group of 2 members.
- Each group was given a paper to write down the answer to each question.
- The members will write the answer in the paper given. Finally, the paper was interchanged with the group, and discussed the correct answers.

- **CO – PO / PSO mapping:**

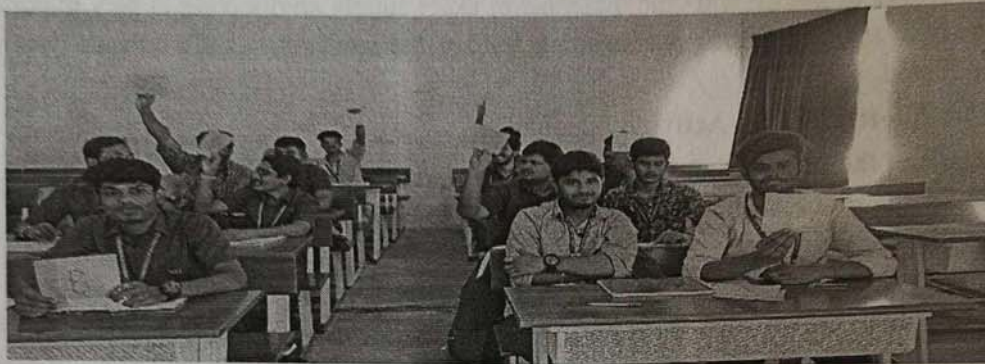

CO	PO7	PSO4
CO2	2	2

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO7	PSO4
Justification for correlation	Students will learn the significance of pipe materials and pumps considering environmental safety & procedures of laying, joining, and safely testing pipelines.	Design of pressure pipes as gravity mains-based pipe material's roughness coefficient.

- Images / Screenshot of the practice:

Reflective Critique:

- **Feedback of practice from students and other stakeholders:**

The students felt easy to remember and recollect the concepts. They got clarity in the choice of pump and pipe selection to environmental conditions and the applications.

Benefit of the practice: (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- This activity helped the students to quickly recap whatever they had learnt regards pipe materials and pumps, their merits and demerits.
- Visible quiz is a team-based activity which supports collaborative learning through which the concepts will be made clear.

- **Challenges faced in implementation:**

- This activity was planned for 10 minutes, but it took 15 minutes for completing that discussion.
