

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Artificial Intelligence and Data Science

Academic Year 2024-2025 (Even Semester)

Degree, Branch, Sem & Sec : B.Tech –AI & DS, VI A
Course Code & Title : CCS368 & Stream Processing
Name of the Faculty member : Mrs. R. Ramana

Innovative Practice Description

Unit : IV/ Event Processing with Apache Kafka
Course Outcome : CO 4
Learning Outcome : TLO 23
Activity Chosen : Collaborative learning
Time Allotted for the Activity : 15 minutes

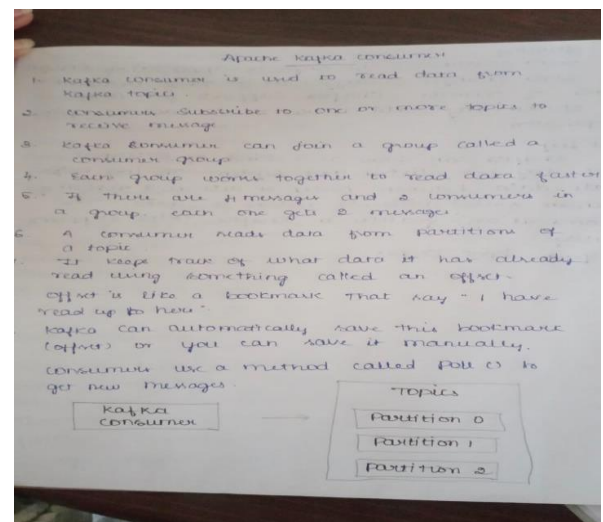

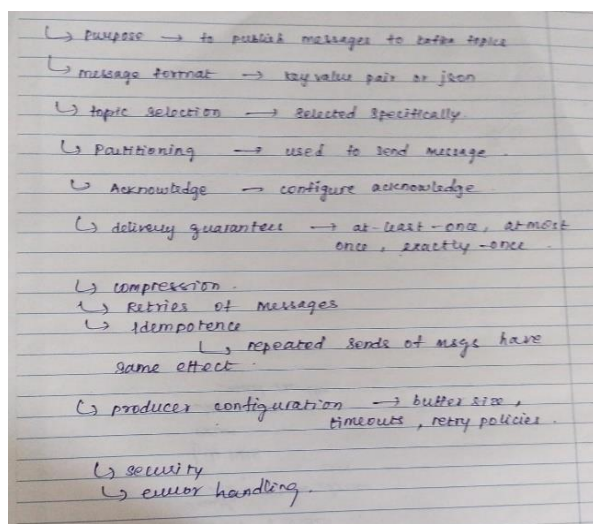

Rationale:

A Collaborative (or cooperative) learning is a learning style where students team up to study, solve problems, or work on tasks together. Students in the group share ideas and helping each other, they gain a deeper understanding of the topic and improve their learning through group effort.

Implementation Summary:

- The instructor in the classroom formed groups consisting of four students each.
- Each group of four students was assigned to explore and discuss the core topics on Apache Kafka concepts such as Events, Producers, Consumers, and Topics.
- Students engaged in meaningful conversations and discuss within their groups, exchanged knowledge and create important points, and considered diverse perspectives.
- A volunteer member from each group presented a summary and share the points of their group's and discussed to the whole class students to get a better understanding on the topic.
- The instructor evaluated both how each student contributed individually and how effectively the group worked together, aiming to measure the success of the collaborative learning strategy.

Images / Screenshot of the practice:

Benefit of the practice:

- The activity promotes teamwork and smooth collaboration.
- It encourages idea sharing, group discussions, and reaching a common conclusion.

Challenges faced in implementation:

- Some students struggle to express key points confidently in front of the class.
- There is an imbalance in participation, with some students being more active and engaged than others.
- Limited time hampers in-depth discussions and thorough collaboration.

Feedback

Active Learning Process – Collaborative Learning

Degree, Branch, Sem & Sec	: B.Tech –AI & DS, VI A
Course Code & Title	: CCS368 & Stream Processing
Name of the Faculty member	: Mrs. R. Ramana

Theme of discussion: Event, Producer & Consumer

Date and Time: 25.03.2024 & 03.45 pm to 04.30 pm

Feedback collected in class and also through online

Feedback Questionnaire:

1. How useful was the collaborative learning activity that we did in class today?

Rating	5	4	3	2	1
--------	---	---	---	---	---

2. Do you have a clear understanding about the Events, Producer, Consumer concepts?

Excellent	Very Good	Good	Satisfactory
-----------	-----------	------	--------------

3. How effectively did your group communicate and collaborate during the learning activities?

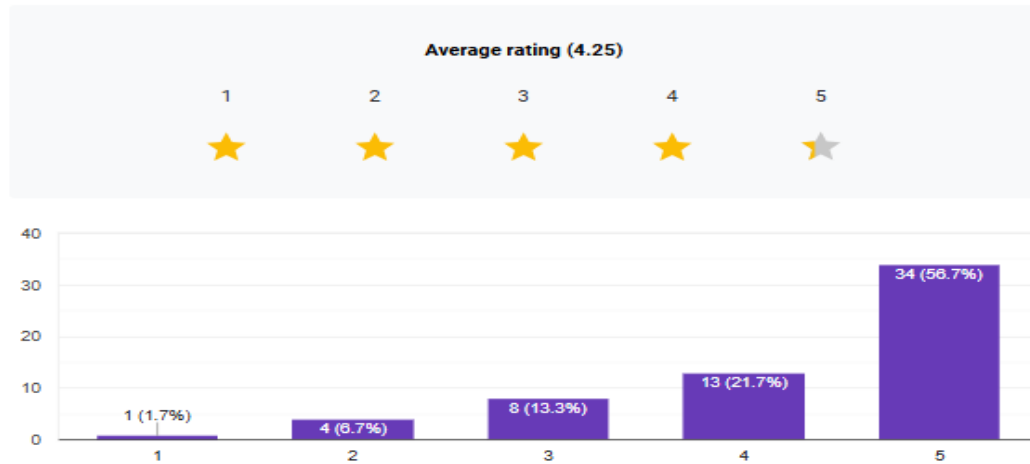

Excellent	Very Good	Good	Satisfactory
-----------	-----------	------	--------------

Feedback Analysis:

1. How useful was the collaborative learning activity that we did in class today?
