

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

Accredited by NAAC & An ISO 9001:2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Business Systems

Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch : VI Semester B.Tech CSBS
Course Code & Title : CCD334 Supply Chain Management
Name of the Faculty member : Dr.S.Erana Veerappa Dinesh, ASP / CSBS

Innovative Practice Description

- **Unit / Topic:** Unit III / Pricing and Revenue Management
- **Course Outcome:** CO3
- **Activity Chosen:** Think Pair Share
- **Justification:**

The concept of pricing and revenue management is crucial for optimizing profitability in supply chain management. Through this topic, students understand how pricing decisions impact demand, inventory, and overall supply chain performance. This activity is selected to encourage students to analyze market dynamics, forecast demand, and apply strategic pricing techniques. It fosters critical thinking and promotes discussion with peers to validate their approaches, leading to better understanding and practical application of theoretical concepts.
- **Time Allotted for the Activity:** 30 Minutes
- **Details of the Implementation:**

A Collaborative, active learning strategy, in which students work on a question posed by instructor, first individually (Think), Write in a paper, then work in pairs or groups (Pair) to solve the problem, and finally share their solution with the entire class (Share).

 - **Think** – Write- Students were provided with case study questions on pricing and revenue management. The student has to think individually and write the answer on a paper.
 - **Pair**- After writing the answers, the students were allowed to discuss with neighbors and justify the resultant answer to each other. The pair with neighbor was shown in Fig.2
 - **Share** - Once the conclusion is made between the pair, then it is to be shared among the whole class by any of the student from the team and Kousalya V of III Year CSBS was share the answers to whole class was shown in Fig 3 .

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PSO1
CO 3	3	3	3	1	3

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PSO1
	3	3	3	1	3
Justification for correlation	The students apply knowledge of pricing strategies and revenue optimization techniques to improve supply chain efficiency.	The students analyze market-driven problems and assess various pricing models to make informed decisions.	The students design and implement appropriate pricing and inventory strategies to maximize revenue in supply chains.	The students demonstrate the ability to collaborate and communicate as a team to develop competitive pricing solutions.	The students apply domain-specific knowledge of supply chain management tools and technologies for revenue enhancement through strategic pricing.

- **Images / Screenshot of the practice:**

Figure 3 Kousalya V Share the answer

Reflective Critique:

- ❖ **Feedback of practice from students and other stakeholders:**

- Some of the students write answers for the questions easily and share their ideas with others.

- Some of them need more explanation and examples to get clarity on the pricing management.

❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

It helps the students to share ideas with classmates and builds oral communication skills. They completed the task by coordinating with each other and get more confidence, clear understanding in this topic when discussing with their peers.

❖ **Challenges faced in implementation:**

- Students who did not fully grasp the concept were unable to complete the activity within the allotted time.
- Ensuring active participation and involvement from all students in this activity proved to be a challenge.
